**Usability Evaluation of FSKM Website
(Faculty of Computer Science and Mathematics)**

Lina Farhana Binti Yahaya

Thesis submitted in fulfilment of the requirement for

Bachelor of Science (Hons) Information Technology

Faculty of Computer Science and Mathematics

May 2010

ACKNOWLEDGEMENT

I would to thank to Allah Almighty for giving me his blessing in completing this research paper. Without his consent, I would never have completed anything. One of the great pleasures of writing this report is acknowledging the efforts of many people whose hard work, cooperation, friendship and understanding were crucial for completion of this project.

My first appreciation would be goes on my parent. Without their support, love, encouragement, faith and everything I have today, I will not be here at all,

I would like to convey my appreciation to my supervisor, Dr. Fariza Hanis Abdul Razak for her guidance, encouragement, comment, ideas, tolerant, support that tell me to produce a better quality of my research and for her guidance, criticism and advice for betterment of this research.

I would like to thank to all the respondents for their contribution and regarding this research.

My acknowledgement would no complete without my friends, who had given me support and co-operation in completing this research. Finally, my sincere appreciation also goes to those who directly and indirectly involved in this study.

Thank you.

ABSTRACT

Current Web applications are very complex and high sophisticated software products, whose usability can heavily determine their success or failure. Defining methods for ensuring usability is one of the current goals of the Web Evaluation research. Also, much attention on usability is currently paid by industry, which is recognizing the importance of adopting methods for usability evaluation before and after the application deployment.

The purpose of the FSKM Web site usability test is to help the management of the Faculty to find out whether the content, navigability, and ease of information retrieval of the Web site can meet the standard and to further improve their services.

The best way to find out whether the FSKM website is usable is to conduct a usability study. The purpose of this usability study is to identify the usability problems in the FSKM website by conducting an observation on numbers of clicks and time used to finish each tasks. The FSKM feedback survey was given to find out about the effectiveness, efficiency, and satisfaction from the participants. Seven test participants were assembled from the students of University Technology MARA and students which are not from University Technology MARA. For the purposes of data collection, participants' information was identified only by their test number. The tasks will perform on the FSKM Website by the respondents and the observation will be conduct. Then the questionnaires will be distributed to all students.

In general, from the result and analysis, all participants' reactions to the FSKM website were negatively affected by the architecture of the site. Information related to education was not all contained within the site and is, instead, located in sub-sites representing each institute or to the Students Portal. The usability of the FSKM website is not as good as it could be and needs to be improved.

TABLE OF CONTENTS

CHAPTER 1	1
INTRODUCTION	1
1.0 Research Background.....	1
1.1 Problem Statement	2
1.2 Research Scope	3
1.3 Research Questions	4
1.4 Research Objectives	4
1.5 Research Significant.....	4
1.6 Overview of the Research	5
1.7 Conclusion.....	5
CHAPTER 2	6
LITERATURE REVIEW	6
2.0 Definition of Usability	6
2.1 Testing Web Site Usability – Why and How?	7
2.2 Usability of interactive systems in general	9
2.3 Testing of Usability aspects	10
2.4 Related Work in the Field of WWW Usability Testing.....	12
2.5 Past Research	14
CHAPTER 3	15
METHODOLOGY	15
3.0 Research Approach	15
3.1 Research Methodology.....	17
3.1.1 Observation - The onsite usability test	17
3.1.2 Task Ratings	18
3.1.3 Primary Data	19

3.2	Types of Data Collections	19
3.2.1	Primary Data	20
3.2.2	Literature Review	20
3.3	Data Analysis	21
3.4	Conclusion.....	21
CHAPTER 4.....		22
DATA ANALYSIS AND FINDINGS.....		22
4.0	Introduction	22
4.1	Test Participants	22
4.1.1	Usage Scenario	24
4.1.2	Tasks	25
4.2	Results	26
4.2.1	Summary	26
4.2.2	Observation - Onsite Usability Test.....	27
4.2.3	Task Completion Success Rate.....	27
4.2.4	Time on Task	35
4.2.5	Clicks on Task	36
4.3.6	Task Rating	38
4.3.7	Summary of Data	40
4.3.8	FSKM Feedback Survey.....	40
4.3	Analysis.....	43
4.3.1	Ease in Finding Information	44
4.3.2	Learnability	46
4.3.3	Efficiency	46
4.3.4	Errors.....	47
4.3.5	User's Satisfaction	47
