ACKNOWLEDGEMENT

Alhamdulillah, I am very grateful to Allah SWT for His Gracious and Merciful giving me all the strength needed to complete this thesis. A thesis cannot be completed without active support from different sources.

I would like to take this opportunity to convey my appreciation to my supervisor, Puan Jamaliah Bt Taslim for her guidance, encouragement, comment, ideas and support that tell me to produce a better quality of my project paper. I also like to express my appreciation to my thesis coordinator, Puan Jamaliah Bt Taslim for her guidance, criticism and advice for betterment of this thesis.

I also would like to thank to my family for their support, financial and encouragement to complete this research and report completely. Finally, thanks to all my friends for their moral support and co operations. May all of us be excellent in our life.

Thank You

ABSTRACT

Preschool is an important stage of education as this is where children start experiencing school life and being away from their parents which will train them with social interaction with other people, being independent, self confidence and good behaviors. In this range of ages they start to explore and try new things in the world. However, there are lot of cases been reported about children injuries and deaths that occurred when they are outside of their houses nowadays. Parents usually worry of their children's safety as they are not around to protect their children. This thesis presents the development of the multimedia application that will help in teaching the preschool children about outdoor personal safety. A step by step phase of methodology that starts by identifying problem and planning, gather the entire requirement and analyzed it, design and development has been carried out to guide this project development. In order to identify the preschool children requirements, interview with parents at preschool has been conducted and the researcher also observed the existing related multimedia application that suits with the children. This multimedia application is believed to be able to help the preschoolers in learning some of the basic safety guide in order to protect themselves from any injuries when they are outside of their houses.

TABLE OF CONTENTS

APPROVAL	ii
DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	ix
LIST OF TABLES	x
CHAPTER 1 – INTRODUCTION	
1.0 Introduction	1
1.1 Background	1
1.2 Problem Statement	3
1.3 Objectives	3
1.4 Scope	3
1.5 Significant	4
1.6 Summary	4
CHAPTER 2 – LITERATURE REVIEW	
2.0 Introduction	5
2.1 Multimedia Learning	6
2.2 Preschool Children	8
2.3 Preschool Children Learning Style	9
2.4 Preschool Children and Outdoor Personal Safety	11
2.4.1 Preschool Children and Road Safety	12
2.4.2 Preschool Children and Water Safety	12
2.4.3 Preschool Children and Playground Safety	13
2.5 Existing System	15
2.5.1 TV and Children	15

2.3.2	Safety Land	15
2.6	Multimedia for Children Learning Application	17
2.7	Human Computer Interaction (HCI) in Application	19
2.5.1	Nielsen's Ten Heuristic	19
2.8	Conclusion	22

CHAPTER 3: RESEARCH APPROACH AND METHODOLOGY

3.0	Introduction	23
3.1	Problem Identification and Planning Phase	25
3.2	Requirement Gathering and Analysis	25
3.2.1	Primary Data	25
3.2.2	Secondary Data	26
3.2.2.1	Academic Journal	26
3.2.2.2	Online Articles	26
3.3	Design	27
3.4	Development	28
3.5	Project Requirement	29
3.5.1	Software Requirement	29
3.5.2	Hardware Requirement	29
3.6	Summary	29

CHAPTER 4: RESULTS AND FINDINGS

4.0	Introduction	30
4.1	Requirements	31
4.2	Conceptual Design	33
