of the requirements for the degree of
Master of Science in Information Technology

Faculty of Computer and Mathematical Sciences

January 2017

ABSTRACT

A healthcare system is a system dealing with human health. It is involve with the patient, family, community, health providers, health service organizations, pharmaceutical companies, health financing agencies, and other organizations. In the military aspects, the health system is used for medical readiness of a personnel. Medical readiness is an important part of the military deployment process in times of conflict. It is important for all service members to stay ready for the tasks ahead. Therefore a Military Lifetime Health Records (MLHR) system is developed by the Malaysian Arm Forces (MAF) to implement this initiative. This study is conducted to identify factors that influence the user acceptance of the MLHR system. The quantitative method has been adapted in this study. The survey has been given to hospital staffs for data collections. It should be known that the acceptance of MLHR system is one of the greatest issue revolving around the successful implementation on MLHR system. This study adopted the Technology Acceptance Model (TAM) and Unified Theory of Acceptance and Use of Technology (UTAUT) model to suit with the current situations and accommodate different environments of MLHR system. The result of this study revealed that 'Perceived Usefulness' and 'Vendor IT Support' are strongly significant factor to the acceptance of MLHR system. The conceptual model is constructed to help MLHR system to improve in term of user acceptance. This study finding will become a reference to the ICT decision maker and system developer in developing and enhancing future MLHR system improvement.

ACKNOWLEDGEMENT

First and foremost, the deepest gratitude of all shall be bestowed to Allah the Almighty and The Merciful for all the insight which He gave to us that lead to the completion of this research. Without His blessings and consent, I might not have enough courage and determination to complete this research. All my thanks and appreciation will be lay upon Him.

My deepest gratitude is extended to my supervisor Dr Nurulhuda Noordin, for all assistance, advice, guidance, encouragement, new ideas and invaluable support given as my project supervisor for a better quality in my research. Thank you for being such a great mentor. I also would like to express my gratitude and sincere appreciation to Prof Dr Haryani Haron for her invaluable knowledge, comment and recommendation on how to enhance my research.

Not forgetting very special thanks to all staff of Hospital Angkatan Tentera Tuanku Mizan (HATTM), participants and all the lecturers, friends also colleagues of Master Science (Information Technology) for their support and encouragement during the process of completing this research.

Finally, I would like to express my deepest gratitude to my beloved wife (Dr) Sophia Ann Murray and families for all the support and courage throughout the master programme. Without their personal sacrifices and being a constant source for encouragement, especially in the final stages, this thesis would not have been possible.

Thank You.

TABLE OF CONTENTS

	Page
AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	ix
LIST OF FIGURES	x

CHAPTER ONE: INTRODUCTION

1.1	Overview	1
1.2	Research Background	2
1.3	Problem Statement	4
1.4	Research Question	6
1.5	Research Objectives	6
1.6	Research Scope	6
	1.6.1 Research Hypothesis	7
	1.6.2 Research Approach	7
1.7	Research Significance	7
1.8	Limitation	8
1.9	Organization of Research Report	9

CHAPTER TWO: LITERATURE REVIEW

2.1	Introduction	10
2.2	Healthcare System	10
2.3	Military Health Services	11
2.4	Military Lifetime Health Records (MLHR)	12

2.5	Overview of Establish Theories on User Acceptance	13
2.5.1	Technology Acceptance Model (TAM)	14
2.5.2	Unified Theory of Acceptance and Use of Technology (UTAUT)	16
2.5.3	Information Technology Acceptance in Healthcare Context	18
2.6	Summary	22

CHAPTER THREE: RESEARCH METHODOLOGY

3.1	Introduction	23
3.2	Research Approach	23
3.2.1	Planning Phase	24
3.2.2	Design Phase	25
3.2.2.1	Research Model	25
3.2.2.2	Research Hypothesis	26
3.2.2.3	Instrument	28
3.2.2.4	Population and Sampling	31
3.2.2.5	Reliability and Validity	31
3.2.3	Information Gathering Phase	32
3.2.3.1	Data Analysis	33
3.2.3.2	Descriptive Statistics	33
3.2.3.3	Test of Difference	33
3.2.3.4	Pearson Correlation	34
3.2.3.5	Multiple Linear Regressions	35
3.2.3.6	Alpha Level	36
3.2.4	Documentation Phase	36
3.3	Conclusion	36
