

**DEVELOPMENT OF RUDENESS REPORTING SYSTEM (RRS) FOR
FAKULTI SAINS KOMPUTER DAN MATEMATIK (FSKM)**

SHADI BIN MOHAMMAD ARAB

**A project report submitted in partial fulfilment of the
requirements for the award of the degree of
Bachelor (Hons.) of Information Technology**

**Faculty of Computer and Mathematical Sciences
Universiti Teknologi MARA**

January 2012

ACKNOWLEDGEMENTS

I would like to thank everyone who had contributed to the successful completion of this project. I would like to express my gratitude to my project supervisor, Puan Jamaliah binti Taslim, for her invaluable advice, guidance and her enormous patience throughout the development of the project.

In addition, I would also like to express my gratitude to my loving parents and friends who had helped and given me encouragement.

**DEVELOPMENT OF RUDENESS REPORTING SYSTEM (RRS) FOR
FAKULTI SAINS KOMPUTER DAN MATEMATIK (FSKM)**

ABSTRACT

Islam encourages Muslims to keep learning. In fact, the first word that was heard from Qur'an, by the prophet Muhammad (peace be upon him), was "Iqra'a". This first word actually means read in Arabic. It is a command from Allah to all of Muslims to learn, search for knowledge and seek the truth.

In many occasions, we find ourselves learning something that we may never use, yet we still learn it hoping we can use it if we ever needed to. In this project, a clear demonstration of how such valuable knowledge can be put to work in real life. This project was born with an ambitious idea to help make the world we live in a better place. It is targeted towards fighting a very unpleasant human behaviour that is also, unfortunately, very common. We face this behaviour almost every day, and on different levels, and we try to solve, deal with it or even worse ignore it. But ignoring a problem never solves it. And in today's world, technology is becoming more relevant to most of our daily tasks. This is exactly why we should combine knowledge from different fields of study to come up with better solutions to our problems. Combining knowledge from the fields of information technology, business management and any necessary fields as well, can help us fight a negative human behaviour such as rudeness more effectively. That is what the project trying to achieve by making it easier to measure a person's rudeness depending on the number of students who report this person in a fixed period of time.

CHAPTER

1	INTRODUCTION	1
	1.1 Background	1
	1.2 Problem Statement	3
	1.3 Objectives	4
	1.4 Scope	4
	1.5 Significance	4
	1.6 Summary	5
2	LITERATURE REVIEW	6
	2.1 UiTM University	6
	2.1.1 FSKM Faculty	7
	2.1.2 UiTM Vision	7
	2.1.3 UiTM Mission	7
	2.2 Negative Behavior	8

2.3	Definition of Rudeness	9
2.4	Definition of Reporting	11
2.5	Definition of Complaint	11
2.6	Definition of Complaint Management	12
2.7	Definition of System	14
2.8	Definition of Web Based System	14
2.9	Information System	14
2.10	Causes of Poor Behavior:	15
2.11	Impact of Rudeness on Others	16
2.12	Importance of Measuring Behavior	18
	2.12.1 Rudeness Costs to Organizations:	19
2.13	Managing rudeness in workplace:	19
2.14	Organizations Taking Action	20
2.15	Objectives of Complaint Management	21
2.16	Benefits of Complaint Management	21
2.17	Advantages of Automating a Business Process	22
2.18	Web Based Rudeness Reporting System	23
2.19	Development Methodology	24
2.20	Iterative Development Methodology	25
3	METHODOLOGY	26
3.1	Project Methodology Phases	26
3.2	Problem Identification and Project Planning	27
3.3	Requirements Gathering Phase	28
	3.3.1 Data Collection	28
	3.3.2 Hardware and Software Required	32
3.4	Design Phase	34
	3.4.1 Logical Design	34
	3.4.2 Database Design	37
	3.4.3 User Interface Design	41
	3.4.4 System Architecture	43
