

ACKNOWLEDGEMENTS

First and foremost, Alhamdulillah, thank you to Allah for the strength and patience granted to me throughout the process of completing my final year project.

I would also like to dedicate a special thank you to my supervisor, Encik Fauzi Mohd Saman, who has been very supportive in listening and giving ideas in regards to my project. Without his patience and guidance, the project would have not been able to complete.

A special thank you goes to my classmates for their help and contributions, especially these last couple of months that have not been easy to any of us.

Also not forgotten to all participants that took part the questionnaire given and to the staff of Jabatan Pelancongan Pelajar who is willing to spend a little of their time to share information that helps a lot during my research process.

Last but not least, to my family, thank you for providing me with unconditional love and support.

ABSTRACT

Footprints Backpacking Trail Mobile Application is a mobile application designed for android users and proposed to promote easy retrieval of information when traveling to highlands in Malaysia for a relatively new traveler community known as backpackers. This application allows users to locate themselves in the map to pinpoint their exact location so that they can identify their starting point before headed out for their journey. Furthermore, this application provides navigation that is set on walking to the listed destination on user's chosen highland. Place of interest (POI) finder function is also included in the application to allow users to locate the place of interest around them. The main objectives of developing this mobile application are to provide navigation to destination on highland and finder for the places of interest nearest to user. This application requires the use of Global Positioning System (GPS) and internet connection.

TABLE OF CONTENT

CHAPTER 1: INTRODUCTION

1.0 Project Background	1 -2
1.1 Problem Statements	2 - 3
1.2 Research Questions	4
1.3 Project Objectives	4 - 5
1.4 Project Scope	5 - 6
1.5 Project Significance	6
1.6 Expected Output	7
1.7 Conclusion	7

CHAPTER 2: LITERATURE REVIEW

2.0 Introduction	8
2.1 Facts and findings	8
2.1.1 Domain	8
2.2.0 Backpacking	
2.2.1 Definition of backpacking	9
2.2.2 Backpackers	10
2.2.3 Backpackers' expectations	10 - 11
2.2.4 Requirements of backpacking	11

2.2.5 Backpacking activities	11 - 12
2.2.6 Backpacking tools	13
2.2.7 Differences between travelers, tourists and backpackers	14
2.3.0 Malaysia	
2.3.1 Place of interest in Malaysia	15
2.3.2 Highlands	16
2.3.3 Highlands in Malaysia	16 - 17
2.3.4 Fraser’s Hill	17 - 18
2.4.0 Trails	
2.4.1 Definition	19
2.4.2 Trail design	19 - 20
2.5.0 Project platform	
2.5.1 Mobile devices	20 - 22
2.5.2 Mobile devices usage	22 - 23
2.5.3 Smartphone	24 - 25
2.5.4 Mobile applications	25 - 26
2.5.5 Mobile devices as substitute to traditional info source	26
2.6.0 Eclipse IDE Software	
2.6.1 Functions	27
2.6.2 Architecture	27 - 28
2.6.3 Platform Structure	28 – 30
