ABSTRACT

These backpacks and bags are especially selected for their high quality, excellent designs and ergonomic load carrying ability.

We have chosen the backpacks and bags here carefully, considering quality first and foremost. All of these packs are designed and built to deliver reliable performance whatever demands are placed upon them. They are manufactured by Fairydown, Deuter and Tatonka, who are all well known established manufacturers, Fairy down supplied equipment to Sir Edmund Hillary during his ascent of Everest so they have some pedigree!

Not only Backpacks and bags but also Travel Bags, Camera Bags, Day Packs, Bike Packs, Children's Packs, Bags, Roller Luggage, Shoulder Bags, Hip Bags and Rucksacks, they are all included in this product for tourism. A good pack is one that will allow you to carry heavy loads over diverse terrain. Quality backpacks and bags are designed so that the harness and the sac complement each other, providing the correct centre of mass, transfer of load and stability. This approach makes users feel that they are wearing a pack rather than carrying it. The load becomes a natural extension of the body, and works with the body's movements, not against them. Each harness component is carefully crafted for correct ergonomic fit. Appropriate fabric types and weights, buckles and webbings ensure that the end product will perform for many years and culminate in a comfortable, reliable and long lasting pack.
