## ACKNOWLEDGEMENT

Praise to Allah the Almighty for giving me the time and strength to complete this thesis. However, even with the strength and time, this thesis could not have been completed without the help of a few parties. Therefore I would like to extend my sincerest thanks to the following people:

First and foremost, my deepest and heartfelt appreciation goes to my parents, En. Ramse Ablah and Puan Siti Esah Osman, as well as my brothers, Eizairil Eira Ramse and Eizanur Muhammad Ramse. Without your never-ending love, advice and support, I would never have made it up to this point. Thank you so much for all that you have done for me.

My highest gratitude goes to my wonderful supervisor, Puan Jamaliah Taslim, for having confidence in me and guiding me throughout the whole project period. Thank you for being so trusting and understanding. Your kindness and guidance really means a lot to me.

A big thank you to Cik Zolidah Kasiran, my course coordinator, who has been devoting her time and energy to guide me through the past number of semesters. Thank you also to all the IT staff, both from the main campus and in the Section 17 campus for the knowledge that has been passed on to me.

## **ABSTRACT**

SKJRM Online is specially developed for Sekolah Kebangsaan Jalan Raja Muda, situated in Kampung Bharu, Kuala Lumpur, after taking into consideration the importance of websites to any organization nowadays. This project consists of six main modules which are Latarbelakang SKJRM, Berita/Buletin, Forum, Motivasi/Kaunseling, Permohonan Online, and Laman Pentadbir Web/Pendaftar SKJRM. The main objectives of this site are to offer faster and easier access to information about the school, to provide a means of discussion between parents and teachers, to provide an electronic application form, and to eliminate redundant data entry of the pupils' personal details into the database. This website is built using Javascript, VBScript, Active Server Pages (ASP), as well as Hypertext Mark-Up Language (HTML) and is implemented according to the Web Development Methodology, where all tasks are divided into several different phases, which are requirements definition, web design, coding and unit testing, web integration and testing, plus operations and maintenance.

## **CHAPTER ONE**

### **INTRODUCTION**

In this new era of information communications technology (ICT), having a website is almost essential to every organization. Not only does it help in conveying updated news and information, it also assists in promoting a certain organization to people from all over the globe. Some activities such as online banking, online shopping, online application, and so on brings great benefit to the users because they are able to do those tasks at their own time and wherever they choose to do it.

At the moment, not many primary schools have their own website, much less an online system, compared to secondary schools and institutes of higher learning in Malaysia. This is mostly due to the fact that most schools do not have the time or expertise in creating a website or an online system.

The same goes for Sekolah Kebangsaan Jalan Raja Muda (SKJRM), among the oldest schools in Kuala Lumpur, which has yet to come up with a website. Situated in Jalan Raja Muda, Kampung Bharu, SKJRM was established in 1939 and at that time was known as Sekolah Melayu Prince's Road. It was a renowned school back in those days.
