ACKNOWLEDGEMENT

“In the name of Allah S.W.T the Most Beneficent and Most Merciful”

Alhamdulillah, with all the greatest gratitude and appreciation to dear God, ALLAH Almighty, I am really grateful to Allah S.W.T for giving me strength, idea and opportunity to complete my final year project.

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to my supervisor, Mr. Fauzi B Mohd Saman, whose contribution in stimulating suggestions and encouragement, helped me to coordinate my project especially in writing this report. I would also like to thank my Project Formulation (CSP 600) Madam Nor Shahidah Mohammad Yusof lecturer and CSP 650 coordinators for their help and guidance, Prof Madya Rashidah Binti Md Rawi and Madam Wan Nor Amalina Binti Wan Hariri.

Furthermore I would also like to express my thankful to my family for their support during my hard times especially while I'm completing this project and their prayers for my success. I would also like to extend my gratitude to my friends for their help and encouragement.

Last but not least, big thanks also to that entire are not listed above for their help, support and encouragement until this thesis is completed. Thanks to all of you.

ABSTRACT

This project focuses on a multimedia development approach to develop a virtual tour for faculty of computer and mathematical science (FSKM) to help new and existing student to find classroom and lecturer room location more easily with aided of virtual tour technology.

There are three research objectives to be achieved. First objective are to identify suitable multimedia System Development Methodology for virtual tour. Second objective are to gathering the requirements and analyze the requirement. Third objective is to design the system and lastly is to develop the virtual Tour for FSKM. This virtual tour project describes class location in detail by providing specific location picture and student will be guide to reach the class destination aided by a series of picture. This virtual tour will be presented interactively by providing some navigation button as a part of user friendly system.
