

**FACULTY OF ELECTRICAL ENGINEERING  
UNIVERSITI TEKNOLOGI MARA**

# **INDUSTRIAL TRAINING REPORT**

**NAME** : MUHAMMAD ASLAM BIN HASIN

**STUDENT ID** : 2013836148

**PROGRAM CODE** : EE112

**ORGANIZATION** : INSTITUT PENDIDIKAN GURU MALAYSIA,  
KAMPUS DATO' RAZALI ISMAIL,  
21030, KUALA TERENGGANU.

**INDUSTRY  
SUPERVISOR** : MR. ALIAS BIN MAMAT

**VISITING LECTURER** : MR. FADHLI DZUL HILMI

**TRAINING DURATION** : 19<sup>th</sup> APRIL 2015 – 11<sup>th</sup> JUNE 2015 (8 WEEKS)

## **ABSTRACT**

As part of graduation requirements, all the undergraduates, the second year and third year students, who take Diploma of Electrical Engineering in UiTM Terengganu will undergo industrial training programme for duration of eight weeks. This industrial training is a course for undergraduates that gives them an opportunity to expose themselves in the real career world so as to they will learn how to relate theoretical learning before and real practical in working's environment. Besides that, in future, they will be having good preparation and understanding for their field of profession. Through this exposure, students will have better understanding of engineering practice in general and sense of frequent and possible problems. This training is part of the learning process. So, the exposure that uplifts the knowledge and experience of a student needs to be properly documented in the form of a report. Through this report, the experience gain can be delivered to their peers. A properly prepared report can facilitate the presentation of the practical experience in an orderly, precise and interesting manner.

## **ACKNOWLEDGMENT**

Thanks to Allah, The Almighty for giving me an opportunity to finish this industrial training within the given period from 19 April 2015 until 11 June 2015 at Institut Pendidikan Guru Kampus Dato' Razali Ismail (IPGKDRI), Kuala Terengganu.

Firstly, I would like to dedicate our appreciation to my supervisor, Encik Mohd Alias Bin Mamat who had provided me with a lot of information, guidance and also had helped me in completing entire industrial training. My supervisor is very understanding and very approachable despite holding respectable position in the department as a Assistant Engineer and supervisor for my training.

I would like to dedicate my appreciation to Encik Ruzzi Bin Razaki as a technician because helped me to complete my training and teach me with circuit diagram during industrial training. Further appreciation goes to other technician, Encik Mohd Sulhan Bin Rashid, as a Assistant Engineer for his suggestion to solve the problem and creative thinking.

Last but not least, I would like to express my gratitude to my dearest friends and lectures on their support and aids which has contributed to my training completion. I indeed very grateful to have all of you around me for giving me courage and energy to complete this industrial training. Thank you very much to all of you.

## TABLE OF CONTENTS

<b>Abstract</b>	01
<b>Acknowledgement</b>	02
<b>Chapter 1: Organization background and structure</b>	03
1.1 Background Organization	03
1.2 Brief History	03
1.3 Teacher Training Courses	05
1.4 Objectives and Functions	06
1.5 Vision & Mission	06
1.6 Position in Organisation	07
1.7 Technical Unit	07
1.8 Unit Function	07
1.9 Building services	09
1.10 Maintenance of civil works	09
1.11 Mechanical maintenance works	09
1.12 Electrical maintenance work	09
<b>Chapter 2: Project 1/ Training 1</b>	10
<b>Wiring System</b>	10
2.1 Material and Apparatus of wiring	10
2.2 Colour Code of Wire	14
2.3 Size of Wire	14
2.4 Type of Wiring	15
2.4.1 Example of Lighting Circuits Schematic Wiring	15
2.4.2 Examples of Socket Outlet Schematic Wiring	17
2.5 Wiring Project	18
2.5.1 Wiring 1: One Light and Fan controlled separately by two one-way switches.	18

2.5.2	Wiring 2: Two Fluorescent Light Points controlled by Photo Sensor	19
2.5.3	Wiring 3: Six Lights controlled separately by three one-way switches.	23
2.5.4	Wiring 4: One Fan, Three Fluorescent Lights Point controlled separately by Four One-Way Switches and Four Socket Outlet	32
<b>Chapter 3: Project 2/ Training 2</b>		<b>39</b>
<b>Solve the Problem of Ceiling Fan and Fluorescent Light</b>		<b>39</b>
3.1	Problem of Ceiling Fan	39
3.2	Solve the problem of Ceiling Fan	40
3.2.1	Broken of Ceiling Fan	40
3.2.2	Slow rotating of Ceiling Fan	40
3.2.3	Noisy sound of ceiling Fan	42
3.3	Problem of Fluorescent Light	42
3.4	Solve the problem of Ceiling Fan	43
3.4.1	Damaged of Tube Bulb	43
3.4.2	Damaged of Tube Starter	44
3.4.3	Damaged of Choke Ballast	45
3.4.4	Damaged of Tube Holder	46
<b>Chapter 4: Project 3/ Training 3</b>		<b>47</b>
<b>Solve the Circuit Breaker Tripped In Distribution Board and Damage of Plug/Socket Outlet</b>		<b>47</b>
4.1	The Circuit Breaker in Distribution Board	47
4.2	The method how to solve Circuit Breaker Tripped	48
4.3	Socket Outlet and Plug	49
4.4	Damage of Socket Outlet/Power Plug and the solution	50
<b>Chapter 5: Conclusion and Recommendations</b>		<b>52</b>
5.1	Conclusion	52
5.2	Recommendations	53
