**A PERSPECTIVE STUDY ON IMPLEMENTATION
OF GRADING SYSTEM IN INDUSTRIAL
TRAINING PROGRAM**

MOHD SHALLEHUDDIN BIN MOHD FAUZI

**Dissertation submitted in partial fulfillment of the requirement for the
degree of Bachelor of Pharmacy (Hons.)**

Faculty of Pharmacy

January 2012

ACKNOWLEDGEMENT

In the name of Allah, the Most Benevolent and Merciful, all praise to Allah, God of universe and may peace to be upon His Messenger. I wish to express my sincere appreciation to all the people who involved in this research project from the beginning till end.

First and foremost, I would take this opportunity to convey my sincere gratitude to my respectable advisor Mr. Meor Mohd Redzuan Meor Mohd Affandi for his assistance, encouragement, ideas and critics that have mound and shape research project. I also wish to extend my appreciation to Mr. Ahmad Mustapha Eid for his comment and suggestion in completing this project paper and to my coordinator PHR 555, Ms. Ruzianisra Mohamed for guidance and support.

Special and thanks also to Ms. Aida Azlina binti Ali who have guided me in preparing my research paper. To my entire lecturer who assisted me throughout my studies, and also my friend who had given their support to me and others who are either directly or indirectly involved in this paper. I wish thank you all so much.

ABSTRACT

Industrial training is a sequence of planned coursework with the objective to gain knowledge on the issues in industries. Alternatively, a grading system is a process of giving evaluation whether it is objective or subjective, through observation or submission of work. Grading system in industrial training is an evaluation done by a preceptor in-charge for the trainee during the whole duration of training. A survey has been done to assess the perception of implementation of grading system during industrial training. Questionnaire was distributed to different independent group of respondents, industry and student. The close ended question with Likert Scale answer ranging from "strongly agree" to "strongly disagree" were distributed in order to assess their perspective. Result from this study indicates that, the grading system put the student in pressure condition to complete the industrial training excellently. All respondent also agree that the system implemented is fair and the grading system process is dependable. The grading system is proved to be a good method to increase student motivation, performance and behavior during the industrial training. This study also has successfully proven that the grading system is a good course for student development.
