ABSTRACT

In the globalization era and the modern world, many varieties of the transports was designed accompany by the national development. In Malaysia, the main sector should be taking responsive in transportations perspective is tourism sector. However, Malaysia has many interesting highland can be visited such as Bukit Larut Highland, Cameron Highland, Bukit Tinggi and etc.

Actually, in Bukit Larut has own their transportations to bring the tourists to enjoy the beautiful of the Bukit Larut surrounding area. Moreover, the transports did not show the Bukit Larut appearance. Then, the aesthetic aspect should be taken in. It is because to make the transports become comfortable, harmony and can attract either foreign or local tourists to visit that highland.

Beside that, the safety aspect also should be taken responsive because to make sure the tourist safety will be guarantee. During conducting this research, the mainly reason to design the Bukit Larut transportations project is to produce the new design of the transportations. Furthermore, it is also should be have the aesthetic value, ergonomic, safety and have the Bukit Larut features itself.
