ACKNOWLEDGEMENT

“BismillahirRahmanirRahim”

I would like to express my gratitude to Allah s.w.t. for His blessing and mercy for giving me the opportunity to complete the report within the time given. I am blessed because I was able to get all the help I need in the completion of this practical training report. Firstly, I would like to thank Dr Noorziah Mohd Salleh, for all the guidance and help that she had given me in the process of steering me in the right direction, providing me with insights in completing the reports and correcting my wrongs. I would also like to thank my parents, for the never ending support, financially and mentally, in all the time I spent preparing this industrial training project paper.

I am very grateful for the people around me that have helped me and motivated me up to the point that I could finish this until the end. The gratitude extends to the people that have helped me at Unsur Hebat Sdn Bhd, Mr Gadaffi Gulistan, Mr Raffiuddin Gulistan, Mr Rithaudeen Gulistan, Mr Rudy Mustapha, Mrs Rabecca and all the other staffs. Without their guidance, I would not have gained a valuable experience in the industrial field.

Not to be forgotten, I would like to thank my research partners, Jasmeen John and Mohd Fadzdy Edzman who have given me their views and opinions regarding the matters relating to this project paper. Without them, I would have been lost and clueless on how to produce this piece. Lastly, I would like to thank all the people who were involved whether directly or indirectly in completing my industrial training project paper.

Thank you.

ABSTRACT

This study provide more detail understanding about what are the employers' perspectives towards work readiness challenges and other factors that contributed to the employability of youth trainees and graduates. Besides that, the research hypothesize will be very useful in helping many parties to develop effective policies concerning employability and also maximizes the job opportunities in Malaysia. Apart from that, this research were help in identifying the information needed as they are the key starting point to influence the policy makers and human resources professionals. By identifying the primary factors that lead to unemployment such as what are the nature, challenges and strategies, it is eventually become guidelines in curbing this problem.
