

**COMPARISON BETWEEN ERLANG B AND ERLANG C
FOR TYPICAL MOBILE RADIO TRAFFIC**

This project is presented of fulfillment for the award of
Bachelor of Electrical Engineering (Hons)
UNIVERSITI TEKNOLOGI MARA

MARAHAKIM BIN MANAP
Faculty of Electrical Engineering
UNIVERSITI TEKNOLOGI MARA

SELANGOR DARUL EHSAN
APRIL 2001

ACKNOWLEDGEMENTS

I would like to thank my supervisor Pn. Norhayati Ahmad for her kindness support and suggestion in order to finish this project paper.

Hereby I would like to express my deepest thank to my family for their understanding and support in completing this course and the final report.

Lastly special thanks to En. Ibadallah from CELLCOM and En. Abdul Halim from Tmtouch for helping me to get the information about this project.

Not forgetting to mention all my friends for their support

ABSTRACT

The aim of this project is to present the comparison between Erlang B (loss call) and Erlang C (queue call) traffic for mobile radio environment.

The data on traffic performance on mobile radio in Klang Valley area are collected and analyzed using a computer package called MATLAB

TABLE OF CONTENTS

CHAPTER	DESCRIPTION	PAGE
I	INTRODUCTION	1
	1.1 Introduction	2
	1.2 Project Objective	
	1.3 Organization Of This Project	2
II	UNDERSTANDING MOBILE RADIO TELEPHONY	3
	2.1 Introduction	3
	2.2 Network Element in Mobile Telephony	4
	2.2.1 Network Element for (user) Traffic	5
	2.2.2 Network Element as Database	6
	2.3 Switching and Switch Control	7
	2.4 Handover	8
	2.5 Cell Pattern	12
	2.6 Radio and Terrestrial transmission	15
	2.7 Current Trends in Mobile Communications	18
III	TRAFFIC THEORY	20
	3.1 Introduction	20
	3.2 Traffic Measurement	21
	3.3 The Unit of Traffic	22
	3.4 Loss System (Erlang B)	25
	3.5 Queuing Systems (Erlang C)	29

IV	DATA ANALYSIS USING MATLAB	32
	4.1 Data Analysis	32
	4.2 Process of analyzing data	34
	4.2 What is MATLAB?	35
V	RESULT AND DISCUSSION	37
	5.1 Utilization	37
	5.1.1 Programming Example	38
	5.2 Traffic Pattern on Different Area	39
	5.2.1 Programming Example For Commercial Area	40
	5.3 Traffic Pattern on Different Time of Day	41
	5.3.1 Commercial Area	41
	5.3.1.1 Programming Example	42
	5.3.2 Industrial Area	45
	5.3.3 Residential Area	46
	5.4 Busiest Day In A Week	48
	5.4.1 Programming Example	50
	5.5 Calculation Example (Based on Data Collected):	51
	5.5.1 Calculation of the traffic capacity per cell	51
	5.5.2 Calculation to find no of subscriber	52
	5.5.3 Calculation for utilization	53
VI	CONCLUSION AND FUTURE DEVELOPMENT	54
	6.1 Conclusion	54
	6.2 Future Development	55
VII	REFERENCES	56
