ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and Most Merciful who has given the strength to for me complete this project and thesis.

My deepest gratitude to my supervisor Prof. Madya Pn. Norhayati bte. Ahmad and En. Jaafar bin Abu Bakar from ERICSSON for the guidance and ideas in completing this final year project. Special thanks to my family and all my friends for their understanding and support throughout the years.

Mustaqim bin Mohd. Sumairi,
Mara University of Technology (UITM), Shah Alam.

ABSTRACT

INFOTAINMENT OVER BLUETOOTH

This project deals with the concept of wireless technology and it is implemented using Bluetooth Technology device. The objective of this project is to analyze the application of the Bluetooth especially infotainment (information and entertainment) base on the chat application that is available right now. The Bluetooth Application & Training Tool Kit is used in this project as to make connection between two PCs. Visual C++ is the software used in building the software interface. For this project, it will only base on point-to-point connection as the device couldn't support point-to-multipoint connection. The project then is proceed by analyzing the chat application.

TABLE OF CONTENTS

CHAPTER			PAGE
1	**INTRODUCTION**		
	1.1	Introduction	1
	1.2	Scope of Project	2
2	**BLUETOOTH IN GENERAL**		
	2.1	Introduction	3
	2.2	Bluetooth in Historical Aspects	3
	2.3	Bluetooth General Features	4
	2.4	The Bluetooth SIG	4
	2.5	How Networks are Form and Controlled	5
	2.6	Bluetooth Operational States	8
	2.7	Network Topology	9
	2.8	Bluetooth Security	11
	2.8.1	Key Management	12

2.8.2 Encryption 15

2.8.3 Authentication 17

3 BLUETOOTH PROTOCOL

3.1 Introduction 19

3.2 Bluetooth Protocol Stack Architecture 19

3.3 Protocol Stack Components 21

3.3.1 Transport Protocol Group 22

3.3.2 Middleware Protocol Group 22

3.3.3 Application Group 23

3.4 Transport Protocol Group Components 23

3.4.1 L2CAP Layer 25

3.4.2 Link Manager Layers 25

3.4.3 Baseband and Radio Layers 26

3.4.4 Host Control Interface (HCI) Layers 26
