Completing this research was a challenging project for us. However, fortunately, we had help from many parties that made this project less difficult. Thanks for their guidance, the critics whether positive or negative, that kept us motivated and on course during all those moments when things were not going as planned. We were delayed. We thank them from the bottom of our hearts for being there in moments of need. Our supervisor, Dr. Hj. Zuraidah Zaaba deserves a special mention here. She was insistent towards our meeting and deadlines which we did not quite appreciate then. But when looking back, her toughness made us work smarter and harder, for that we will always be grateful.

I would like to give a huge thank to our lecturer in the Faculty of Administrative Science and Policy Studies (FSPPP) UiTM Sabah, who taught us many things about research but did not tell us that it would be so difficult. Things do not always go as expected or planned. You have to make adjustments but these adjustments must be justified and qualified.

We would like to thank God Almighty, without whose blessing, we will not have successfully completed this proposal of research.
