## **ACKNOWLEDGEMENT**

All praises be to Mighty Allah S.W.T, the Merciful and Beneficent for the strength and blessing bestowed upon me through out the entire research and completion of this thesis. Peace is upon our prophet Muhammad S.A.W; whose has given light to mankind.

I wish to express my sincere appreciation and gratitude to my supervisor, Puan Norhayati Bt. Ahmad for her guidance, comments, encouragement and constant support during the period of this thesis. My deepest gratitude also goes to my co-supervisor Puan Nor'aini Haji Abdul Jalil for constantly supplying me with valuable sources (reference book) in helping me to complete my thesis.

I am also greatly indebted to all my panels, for their time and effort in proofing this thesis, and I really do appreciate their valuable suggestions and criticisms.

Finally, my deepest appreciation goes to my parents and family, for their love, understanding and encouragement and also to Zurina Lasim for being the source of my inspiration. I dedicate this piece of work to all of them.

## **ABSTRACT**

Web based application is indeed the most widely used technology today. The Web offers so much option that it becomes the single most used information bank in the world. With its ever-expanding technology, there is virtually no limit to what it may offer. This project deals with creating an on-line information system for laboratory to be utilized by students. The software used in developing this project are HTML and ASP.
