## **ACKNOWLEDGEMENT**

In the name of Allah, the Most Benevolent and the Most Merciful.

I am most grateful to our mighty Allah S.W.T who gave me idea and physical strength in preparing this Final Year Project. I wish to express my gratitude to individuals and all parties who have responded to the research and also offered their valuable contributions in carrying out this dissertation.

I would like to acknowledge and extend my heartfelt gratitude to my supervisor Puan Ros Shilawani Binti Sheikh Abdul Kadir for her vital encouragement and support. My gratitude is also extended to my supervisor for her valuable guidance and contribution of ideas and also patience in preparing this Final Project. I also would like to extend my gratitude to my co-supervisor Associate Professor Zunairah Binti Haji Murat for her understanding and assistance.

I also would like to thank Puan Rosnah Binti Kassim and Cik Roshakimah Binti Md Isa, who assisted me at Biomedical Research Laboratory for Human Potential and also for the provided facilities that had given for me to complete this research.

Besides, not forgetting my parents Encik Che Omran Bin Che Wan and Puan Nazirah Binti Yaacob and all my friends especially Nik Nurul Sakinah Binti Nik Mohamed for the help and the constant reminders and also much needed motivation. Not to forget for those who involved as volunteers that makes this possible and complete.

Thanks all for the love, contribution, understanding and encouragement and being the source of my inspiration.

Thank you

**Che Izwan Hafiz Bin Che Omran**

## **ABSTRACT**

This paper present on the effect of rock and nasyid music to human body aura using Resonant Field Imaging (RFI). This research involves 30 samples. All samples were interviewed before tested using RFI. The frequency measurements will be taken 3 times on chakras which is for initial condition, after listening to rock music and after listening to nasyid music. The human body aura and total aura score was analyzed from the frequency reading and comparison between initial condition and after listening to both music will be made. The analysis shows that 73% of the samples have improved their total aura score after listening to nasyid music and 17 % increased their total aura score after listened to rock music and only 10% of the samples maintained their initial total aura score after listening to both of the music. As a conclusion, listening to nasyid music give the better human body aura compared to rock music.

**Keyword-:** human body aura, rock, nasyid, RFI,chakra
