ACKNOWLEDGEMENT

All praises be to Allah S.W.T, Lord of Universe, the Merciful and Beneficent Salam to Nabi Muhammad S.A.W, his friends, companion and the people who follow his path.

I would like to express my gratitude and sincere appreciation to my supervisor, Prof. Madya Zunairah bt. Hj Murat for her suggestions, guidance and invaluable advice throughout the preparation and completion of my final year project.

I also would like to thank everyone who has involved directly in completing this project. I also would like to thanks to my parents and families for their love and support throughout the years, without them, would never have gone this far.

Thank you,

Amyza binti Ibrahim

ABSTRACT

This paper presents a research project on analyzing the brainwave pattern with correlation to motion technology using Electroencephalogram (EEG). Motion technology is an experimental method, or process designed to relax the physical body and synchronize the electrical activity of the brain through horizontal rotation measurement.

The brainwaves of twenty one samples were observed before and after the motion treatment using EEG equipment. In addition, each sample undergoes at least 5 sessions of treatments. A short interview was carried out for each respondent to confirm the results.

In general, the result shows that the motion treatment produces significant improvement in terms of increasing alpha state signal of the brain. It was found that this treatment produces a significant improvement in terms of health condition and could reduce smoking.

CHAPTER	
1. INTRODUCTION	
1.1 Introduction	1
1.2 Background of study	2
1.2.1 Motion Technology	
1.2.2 Electroencephalogram (EEG)	
1.3 Objective of study	3
1.4 Significant of the project	
1.5 Scope and limitation of project	
2. MOTION TECHNOLOGY	
2.1 Definition	4
2.2 Background on motion therapy	5
2.3 Motion Technology	6
2.3.1 Biophysical Basis	7
2.3.2 Electromagnetic Basis	8
a) Magnetic Mechanics	9
b) Piezoelectric Mechanics	10
c) Electro field Mechanics	11
2.4 Centrifugal motion	14
2.4.1 Magnetic Induction for Clockwise (CW)	15

2.4.2	Magnetic Induction for Counterclockwise (CCW)	16
2.5	Electroencephalogram (EEG)	17
2.5.1	Recording Techniques	18
2.5.2	EEG Amplitudes and Frequency Band	
2.5.3	EEG Analysis	
3.	BRAIN WAVE	
3.1	Introduction	19
3.2	Brain Dominant	
3.2.1	Left Side Dominant	20
3.2.2	Right Side Dominant	21
3.3	Brainwave Patterns	22
3.3.1	Beta Waves	23
3.3.2	Alpha Waves	24
3.3.3	Theta Waves	25
3.3.4	Delta Waves	26
4.	METHODOLOGY	
4.1	Introduction	27
4.2	Data Collection	
4.2.1	Questionnaire	28
4.2.2	EEG Data Collection	
4.3	Software development	29
4.4	Data Analysis	32
5.	RESULT AND DISCUSSION	
5.1	Introduction	33
5.2	Part I (Questionnaire)	
5.2.1	Quality of health non smoker before and after treatment	34
5.2.2	Quality of health smoker before and after treatment	35
5.3	Part II (EEG Measurement Data)
