

**MONITORING CARBON MONOXIDE EMISSION IN THE AIR USING  
WIRELESS APPLICATION**

**AHMAD NOOR ZAINI BIN MOHAMMAD ZAIBI**

**FACULTY OF ELECTRICAL ENGINEERING  
UNIVERSITY TEKNOLOGI MARA  
MALAYSIA**

## **ACKNOWLEDGEMENT**

Upon the completion of this Final Year Project, I would like to dedicate my thanks to few individuals that have been helping me throughout the process of completing this Final Year Project.

Firstly, I would like to thank to the All-Mighty Creator, Allah S.W.T The Most Merciful and The Most Gracious that has been given me the strength and ability to complete this Final Year Project. Without His concern, I would not be able to finish this project.

Secondly, a greatest appreciation to supervisor, Puan Norhayati Hamzah for her assistance, guidance and advice do that I can complete this project successfully.

My deepest acknowledge to my beloved family, my parents, my wife and my little son for their invaluable love, affection, encouragement and support.

Above all, I would like to thanks to all my friends and the entire individual who has involved directly or indirectly who has contributed during the time of completing my Final Year Project.

Many Thanks and May Allah Bless always.

## ABSTRACT

Concerning due to very high load of carbon monoxide emission in the air, this study is to monitor the CO emission load via wireless application. Earlier research done showed that the Potential Health Hazards of Air Pollution especially carbon monoxide (CO) give various unhealthy effects. At low concentrations, it can fatigue in healthy people and chest pain in people with heart disease. At higher concentrations, it can impaired vision and coordination; headaches; dizziness; confusion; nausea also can cause flu-like symptoms that clear up after leaving home and the worst effect is fatal at very high concentrations. In this system will be focus on collecting data from TGS 800 sensors and stored in PIC16F887, then using (GSM) modem the data sent as a Short Messaging System (SMS) alert to the subscriber's mobile phone.

# TABLE OF CONTENTS

<b>CHAPTER</b>	<b>CONTENT</b>	<b>PAGE</b>
	Declaration	iii
	Acknowledgment	iv
	Abstract	v
	Table of Content	vi
	List of Figures	viii
	List of Tables	x
<b>CHAPTER 1</b>	<b>INTRODUCTION</b>	
	1.1 Background of Study	1
	1.2 Problem Statement	2
	1.3 Research Objectives	4
	1.4 Significances of Study	4
	1.5 Scope & Limitation of Study	4
	1.6 Project flow chart	5
<b>CHAPTER 2</b>	<b>LITERATURE REVIEW</b>	
	2.1 Carbon Monoxide (CO)	6
	2.1.1 Effects of Carbon Monoxide	7
	2.1.2 Monitoring Carbon Monoxide	8
	2.2 Wireless Technology	9
	2.2.1 Wireless Sensor Network	9
	2.2.2 GSM Modem	10

2.2.3 SMS service and the advantages	11
2.3 Design Software for monitoring Carbon Monoxide	12
<b>CHAPTER 3</b>	<b>METHODOLOGY</b>
3.1 Hardware Development	14
3.1.1 Overall System Block Diagram	15
3.1.2 Type of Sensor	16
3.1.3 Analog to Digital Converter (ADC) And Microcontroller	17
3.1.4 Wireless Application Transmitter (GSM modem)	20
3.2 Software Development	22
3.2.1 MPLab Coding	22
3.2.2 Program Assembling	22
3.2.3 PIC Program Burning	23
3.2.4 Evaluation	23
3.2.5 Program Flowchart	24
<b>CHAPTER 4</b>	<b>RESULT AND DISCUSSIONS</b>
4.1 Hardware	25
4.2 Display	28
<b>CHAPTER 5</b>	<b>CONCLUSION</b>
	33
<b>CHAPTER 6</b>	<b>FUTURE DEVELOPMENT</b>
	34
