ACKNOWLEDGEMENT

I would like to express my appreciation to all those who gave me the possibility to complete this thesis. First of all, I would like to express my deepest sense of gratitude to my advisor Mr. Mohd Shamlie Salisi for his patient guidance, encouragement and excellent advice throughout this study. I would like to thank my friends who encourage and support me towards the completion of my thesis. And last but not least, I cannot end without thanking my family for their constant encouragement and support throughout my time in UiTM Sabah.

Thank you.

ABSTRACT

The purpose of this research is to identify the determinants of dividend payout in the Malaysia by looking at the conventional banking sectors. Panel data set was constructed from the conventional bank in Malaysia. The results show significant relationship between profitability and dividend payout for conventional bank in Malaysia. Conventional banks distribute higher dividends when they record higher profitability. On the other hand, financial leverage and revenue growth do not shows significant relationship with dividend payout.
