ACKNOWLEDGEMENT

Firstly, we are grateful because we have been given the chance to further our study at University Technology MARA in Bachelor of Administrative Science (Hons) and thus, do our research paper, which we believe will be a very good opportunity for us to gain knowledge apart from completing the requirement in this course.

Other than that, we want to thank to Mr. Haijon Gunggut and Mdm. Dayang Siti Noor Saufidah, who were the lecturer for the subject of ADS 555, as well as our supervisor, Mdm. Afida Arapa because they had teach, guide and help us in preparing our research proposal.

We also want to thank our parents for giving us supports in terms of motivation and financial, in preparing of this research.

Last but not least, we also want to thank our friends for helping us in completing our research.

THANK YOU

CHAPTER 1

1.1 INTRODUCTION

Library is the important place for the people especially the students since it helps the students in their learning process. As it seems important for the students, library should be able to provide a conducive environment in order to help the students to do their revision and other learning purposes. Therefore, measuring the students' satisfaction is a vital to ensure the role of library in supporting learning environment process. So, the feedback from its users is important to assist the library management in making assessment and improvement towards their quality services (Filiz, Y. Z., 2007).

As the center of attention among the students in supporting learning environment process, library should be able to offer and deliver good services towards the students in order to create satisfaction. Basically, libraries are helping to inspire and motivate the educational and study activities by offering access to world-class information resources. So, understanding the user's needs is vital since it influence the perception and satisfaction of the users and become the milestone for the success of the library. The ability of the library to meet the students expectation when deliver the services represents their successfulness. However, it still depends on the students' judgment towards services given (D, M. K., 2004).
