ABSTRACT

This study was conducted to evaluate the ‘Participants Perceptions Towards The Effectiveness Of The Entrepreneurships Training Conducted By Yayasan Sabah in Sandakan District. The reason for conducting this research is to know the perceptions towards the entrepreneurships training, either it is succesful by the participants or not. This perceptions not only for looking what the story of success participant but want to know what the knowledge that the participant have after contribute this training. The research design was used for this study, is a descriptive method, in which primary data as well secondary data were gathered. The respondents for this study are the participants who have already participated in the entrepreneurships training conducted by Yayasan Sabah in Sandakan. From this study, it is found that all the participants are contributed well in this training, and they practiced the knowledge from this training with their family and most of them are very committed in every training that is conducted by Yayasan Sabah. This study also helps us to understand more about this entreprenueurships in term of the participants contributions.
