ACKNOWLEDGEMENT

It is a difficult and tiring task for us as the researchers to complete this research. However, it teaches us about patience and perseverance is the vital ingredients for success in any tasks and fortunately we had the help of many parties that made this project manageable. Our supervisor, En Azma Asnawi Shah kept us motivated and helps us a lot throughout the course of completing this research and he never cease to help us regarding our research even though he had to sacrifice his weekend. With that, we thank him from the bottom of our heart.

We also like to thank the lecturer who taught us many things about research and willing to help us especially when we faced several problems regarding our research.

Moreover, we would like to extend our gratitude to our parents who supported us morally and financially. Besides that, deep appreciation is also extended to our friends and fellow classmates who are willing to share vital information with us especially information regarding the research formats and datelines.

We would like thank God Almighty without whose blessing we will not have successfully completed this study.

Abstract

There is much excitement about the use of Internet. This is due to the fact that Internet had become a vital part in our daily life. Internet had become more than a communication tool but also as a source of gathering and retrieving information. Hence, Internet plays a crucial part in the life of a student's especially university students. Thus, this study examined the difference between the new and final year students in Universiti Teknologi MARA, Shah Alam in terms of Internet usage in order to found out the level of Internet literacy among these students. A random sample of 120 respondents that consists of 60 new students and 60 final year students are selected for this study. The respondents are examined on the extent of our independent variable that consists of Perceived Usefulness, Perceived Ease of Use and Perceived Access that influence their Internet usage among. The findings show that there is positive connection between Perceived Usefulness, Perceived Accessibility and Perceived Ease of Use with our respondents Internet usage. Moreover, all of our respondents knew hoe to use Internet.

CONTENTS

Chapter I:

1.1	Introduction	1
1.2	Problem Statement	3
1.3	Research Objectives	3
1.4	Scope of the study	4
1.5	Significance of the Study	4
1.6	Limitation of the study	5
1.7	Key terms/concepts	6

Chapter II: Literature Review & Conceptual Framework

2.1	Literature review	8
2.1.1	Technology Acceptance Model (TAM)	8
2.1.2	Usefulness	13
2.1.3	Access	15
2.1.4	Ease of Use	16
2.1.5	Internet Usage	19
2.2	Conceptual framework	21

Chapter III: Research Methodology

3.1	Research Design	24
3.2	Sample size	25
3.3	Sampling Technique	25
3.4	Unit of Analysis	26
3.5	Conceptual and operational definition/measurement/ instrumentation	27
3.5.1	Perceived Usefulness	27
3.5.2	Perceived Ease of Use	28
3.5.3	Accessibility	28
3.6	Instrumentation	28
3.7	Data Collection	29
3.8	Data analysis	29

Chapter IV: Findings

4.1	Introduction	31
4.2	Profile of The Respondents	31
4.3	Univariate Analysis	35
4.4	Findings	37
4.4.1	Analysis on the Internet usefulness between the new and final year students in Universiti Teknologi MARA	37

4.4.2	Analysis on the Internet access between the new and final year students in Universiti Teknologi MARA	42
4.4.3	Analysis on the Internet ease of use between the new and final year students in Universiti Teknologi MARA.	45
4.5	Summary	49
Chapter V: Discussion & Conclusion		
5.1	Introduction	50
5.2	Implication	50
5.3	Recommendation	52
5.3.1	Increases the numbers of computer for students use in the University	52
5.3.2	University academic department should formulate and create a new course that teaches on how to use Internet and its usages	52
5.3.3	University students must have their own computers	53
5.3.4	University administration department should allow Internet access in the student's hostels	53
5.4	Conclusion	54
