PREFACE

The quality of the personality and character needed for a managerial position are no longer themselves sufficient for the conduct of the business. In the present highly competitive world, they need to be supplemented by extensive specialist knowledge.

This case study may very useful to the building maintenance or the building surveyor and it also can be use a reference to the building. They should have sufficient knowledge of the subject dealt with in this book to enable them to recognize fault, make the best of use the modern ideas, and discuss technical matters intelligent with expert.
