ABSTRACT

Safe city refers to the idea in the community that uses technology to help the government and the community to reduce crime rates as well as create a safe and comfortable environment for the community. A safe city is also a livable environment in the context of sustainability where it is able to preserve the city for the quality of life of the community. The existence of a safe city is said to be able to reduce the problems found in urban areas such as vandalism, threatening public safety and roads as well as public health. The purpose of this study is to identify the level of effectiveness of safe city programs, determine the importance of safe city programs and identify facilities or actions to reduce crime rates based on the concept of safe cities among communities in Malaysia. This study was conducted using quantitative methods and non -probability sampling, sampling facilities in collecting data by distributing questionnaires to the community from all states in Malaysia. Based on the findings of the study, factors such as crime rates, vandalism, public safety and health as well as road safety influence the effectiveness of the implementation of safe city programs in Malaysia. Therefore, this study can provide benefits to the government to implement the safe city program more effectively in reducing the problems in the city.

Keywords: Safe City, Concept Safe City, Crime, Vandalism, Public Safety, Public Health, Road Safety

ACKNOWLEDGEMENT

First of all, we are expressing our gratitude and praises to Allah SWT for shower us His blessings, guidance, strength and good health in order to finish our research proposal. Our appreciation and gratitude are extended to our supervisor, Dr. Shawal Sahid Hamid @Hussain, Senior Lecturer Faculty of Administrative Science and Policy Studies Universiti Teknologi MARA (UITM) Negeri Sembilan Cawangan Campus Seremban 3 for giving us the opportunity to do the research and providing us invaluable guidance throughout this research. It was a great privilege and honor to work and study with him. His vision, sincerity and motivation had deeply motivated us to complete our research. We are extremely grateful for what he offered us.

Not forgetting our lecturer, Dr Nurul Hidayana Binti Mohd Noor for her dedication and commitment in providing us guidance throughout the process of carrying out this project. Certainly, without advice and guidance from her, we would not have been able to complete this research successfully within the given period. She has also taught us regarding on how to carry out the research and how to present research clearly.

We would also like to express our respect and love to our parents and friends who have always given us support and encouragement to complete this project. Thanks are extended to all parties who have been involved with this study either directly or indirectly throughout the course of this project. Their contribution helps a lot in the strengthening mind and keep our vision to focus on this research.
