ABSTRACT

The study's goal was to investigate the and determine the relationship of the effectiveness of waste management among the public in Malaysia between public awareness and education, public participation, and roles of government. The study also investigated the satisfaction level of the effectiveness of waste management in the neighbourhood among the public Malaysian. The research was carried out from April of 2022 to July of 2022. This study adopted the convenience sampling and questionnaires in collecting the data. This study will be conducted among the Malaysian public to determine the effectiveness of waste management. The purpose of this study is to find out the factors that contribute to the effectiveness of waste management as solid waste management is considered the biggest challenge Malaysia has to face. The result from this study is that the Malaysian public is aware of waste management. There is a significant relationship between effectiveness of waste management and public education and awareness, public participation, as well as roles of the government in Malaysia. This study's findings could be used as a reference for improving current policy in order to enable its efficiency in the present and future.

Acknowledgement

First and foremost, we want to thank and honour Allah SWT for providing us with the blessings, power, serenity and good health that we needed to successfully complete this research. Then, we would like to express our gratitude and thank Dr Fuad bin Karim, our supervisor, for providing this fantastic opportunity for conducting this research. Dr Fuad bin Karim's direction has been a great help for us in completing this research. Additionally, in order to complete this project correctly and effectively, he has related his experiences in carrying out research in the past too. Without his assistance and guidance, we would not be able to accomplish this research to the best of our abilities.

Not to forget, we would like to express our gratitude to Dr Noor Hidayana binti Mohd Noor, Senior Lecturer in the Faculty of Administrative Science and Policy Studies at Universiti Teknologi Mara (UITM) Negeri Sembilan Cawangan Seremban 3, who taught us how to design and carry out this research. She clearly explained the ways to do the research and the current research functions to us. We are also appreciative of our family members for their never ending support and encouragement during this study process. Plus, we would like to extend a special gratitude to all of our classmates, colleagues, and friends who have supported and helped us. Last but not least, we would like to thank everyone who has helped us, directly or indirectly, to finish this research.
