ACADEMIC PROJECT

RISK ASSESMENT IN ECO TOURIST PARK

PREPARED BY:

**MOHAMED FAIRUZ BIN NORDIN
BACHELOR (HONS) IN BUILDING SURVEYING**

SEPTEMBER 2007

Dedication

In the name of ALLAH the most merciful and forgiveness and pray to his profhet given guide to mankind for the truth. Alhamdulillah, with the strength and wisdom given to me to accomplish my project bachelor of building surveying (hons)

In this moment, I want to give my gradetitud to my supervisor Mazlan Abu Bakar providing me with full support and encourage me to finish the task .sincerely, I thank you for all that is good came from him which I learn during the project

For my father En Nordin Sulaiman and my mother Pn. Rohhayah and my family given me all the energy and kindness to help me in this project, I appriariate and thank you

Not to forget, my friend who help me during the project. Abu, Fizi, Eddy, Abang, Paan and all who help me to finish the project

Abstract

Any develop or under develop eco tourist park should be able to identify any potential or possible risk that might or will occur to the visitor by adopting any method of safety program or services. The rapid development of any park can also cause impact to the environment and the ecology of plant and animal. However in the aspect of safety and the protection on both visitor and environment should be managed carefully to balance the effect of the risk inside the park. There still needs of safety in the park today with the possibility of risk which is not foreseen by the management of the park.. This study is to asses the risk at the potential part in the eco tourist park and evaluates the possible risk to the visitor. The overall facilities and services are provided in each park for the user. However, the awareness of the visitor should be increases in the park for any risk involved in the area. The safety measured should be more on maintaining the park facilities and services and information method to the visitor in the area which pose risk to them
