ACKNOWLEDGEMENT

All thanks to Almighty Allah SWT, who has provided us with the patience, blessings, and direction we need to finish this final year assignment in its completeness for this final year project as a whole.

We would like to express our gratitude to our main supervisor Madam Nor Syamaliah binti Ngah and our Co-supervisor, Dr. Wan Normila binti Mohamad for all of their help in getting us through this project and helping us achieve our goals. This project would have been impossible to complete without their encouragement, support, and inspiration. As soon as we ask for guidance, they always there to provide a helping hand and share their knowledge with us. In addition, our supervisors are always willing to provide comments so that we may enhance our writing as we work to complete this study. As a result, we'd like to express our gratitude to the faculty and staff of the Faculty of Administrative Science and Policy Studies for their assistance and support. The completion of this study was made possible by their encouragement and assistance.

We also would like to thank our parents and family for their constant encouragement and support as we worked to complete this research. All support that we have received has been helpful in ensuring that this research was completed on time.

Furthermore, thank you to our friends who always give morals to us completing this research. We are so grateful to have such good friends who are willing to share their knowledge, experiences, and also help us to succeed with our research paper.

Finally, but certainly not least, we would like to use this opportunity to express our appreciation to everyone who has contributed us in any way, whether directly or indirectly, on our path toward successfully completing this research. Their assistance and support were really valuable to us as we worked to finish this project.

ABSTRACT

The purpose of this paper is to investigate the factors that influence students' performance in Web-Based Learning (WBL) at UiTM Kampus Seremban 3 during the COVID-19 Pandemic. The participants in this study are degree students. In order to collect data for the study, researchers utilized an online structured questionnaire to collect 348 responses from students. Researchers have also used quantitative methods to analyze data. The research aims to find out the relationship between learning attitudes, learning anxiety, and learning motivation to student performance in web-based learning. According to the findings, a constructive connection exists between student performance and factors including learning attitudes, learning anxiety, and learning motivation. In this study, researchers have prepared some limitations for future research.
