ACKNOWLEDGEMENT

Alhamdulillah, we have finally completed this research project report as one of the requirements that need to be accomplished for Applied Research (ADS555) subject in this semester.

First and foremost, we want to appreciate and thank our Faculty of Administrative Science and Policy Studies (FSPP) in UiTM Seremban for allowing us to participate in this research project. During the preparation of this research project, we have obtained a lot of new knowledge and experience in facing several situations and obstacles that we never experienced before while completing our project. Therefore, this experience and knowledge gained by us will surely be useful in the future.

Secondly, it is our sincere intention to convey our heartfelt gratitude and appreciation to our competent lecturer, Dr Norraidah Abu Hassan as our excellent supervisor in guiding us to complete this project. Her devotion and great concern in assisting her students as best she could truly inspire us to achieve and give the best that we can. We would not be able to finish our research without her assistance. Her excellent counsel and rigorous observation allowed us to understand the bigger picture on the topic that we were working on. Not only that, we were able to complete the report without difficulty because of her great skills to assist us. We are extremely grateful to our lecturer.

We would also want to thank our parents for providing us with the moral support we require during this research project's journey. Without their support, we would be less driven and demotivated to complete all of the research project requirements. Lastly, we also want to thank other people who are also involved whether directly or indirectly in the success of this report.

ABSTRACT

The goal of this study is to explore the experience of parents towards students' online learning in Malaysia Primary Education during COVID-19 outbreak which involved learning assignments, online learning methods used and digital usage as their variables. Therefore, this research project involves 350 of parents in Putrajaya especially in Presint 8, 9 and 11. Furthermore, this study is performed to establish the essential relationship between independent variables and dependent variables. This research also shows that the learning assignments, online learning methods used, and digital tools usage have a vital relationship with the experience of parents during online learning. In addition, the survey used by researchers in by using online questionnaires in the google form platform. The survey has also provided the researchers with a clear and great insight into the issue. Not only that, the findings of this research shows that many parents experienced online learning during COVID-19 outbreak since they need to assist their children during online classes. This study concludes that the learning assignments, online learning methods and digital tools used in online learning really helps the students and parents in wading through the online learning.
