ACKNOWLEDGMENT

In the name of Allah, the Most Gracious and the Most Merciful, Alhamdulillah, all praises to Allah for the strengths and His blessing in completing this research. We would like to express our gratitude and appreciation to all those who gave us the possibility to complete this research. A special thanks to our supervisor, DR Radduan Yusof for her help, stimulating suggestions and encouragement throughout this research. Without his invaluable help of constructive comments, suggestions, his support, and knowledge this research proposal would not have been possible to complete. Special and sincere thanks dedicated to all our friends who helped each other to complete research and gave suggestions. Finally, deepest gratitude goes to our beloved parents for their endless love, prayers, and encouragement. On the other hand, to those who indirectly contributed to this research project, their kindness means a lot to us. Thank you very much.

ABSTRACT

The purpose of the study was to examine determinant that contributes to intention of vaping among uitm student. The study was carried between May until July 2022. This study employed a probability stratified sampling techniques in collecting the survey data. The result of the study revealed important findings. First, majority of the targeted respondents were agreed with that there are relationship between the attitudes, social norms and perceive behavioural control (PCB) with intention of vaping among UiTM students. Therefore, this studies uniquely positions itself to make both theoretical and empirical contributions to the multi-domain literature including management and psychology literature.
