Abstract

Motivation a mechanism that will urge a person to do anything it takes to achieve what they want. From the student's perspective, motivation is a process in which students 'attention is directed toward accomplishing their academic goals and their energy is directed toward achieving their maximum academic potential. Students who are highly motivated tend to put forth more effort in their studies, resulting in better outcomes in their academic performance. During the pandemic of Covid-19, the situation is changing all around the world where everyone needs to be quarantined and stay at home in order to curb the spread of the Covid-19 virus. The Malaysian government had imposed a Movement Control Order (MCO) that forced all universities to conduct online distance learning. The issue that might arise in university culture includes the declining amount of motivation among the students. In this research, the researchers choose the topic of Student Motivation and Academic Performance during Online Distance Learning (ODL): A Case Study on Students in UiTM Seremban 3 Campus. Motivation can be driven by either intrinsic or extrinsic factors, or by a combination of the two. The researchers had identified that the satisfaction with course content, the need for communication, and self-regulation are the internal factors or the intrinsic motivation that drive the student academic achievement during online learning. Furthermore, extrinsic motivation during online distance learning is highly influenced by the role of the lecturer, the online learning environment, and technical facilities. This study will provide an overview to the pattern of student motivation during online distance learning (ODL) by looking at the level of their academic performance through online distance learning (ODL).

Keywords: Movement Control Order (MCO), Online Learning/ Online Distance Learning (ODL), Motivation, Academic Performance

Acknowledgement

First and foremost, we would like to take this opportunity to express our utmost gratitude to Allah S.W.T, the Almighty, for providing us with good health and knowledge for us to accomplish this research. We are very grateful that we managed to successfully complete this research proposal entitled Student motivation and academic performance: A case study on students in UiTM Seremban Campus.

Next, we would like to acknowledge and give our warmest thanks to our supervisor Miss Shahidah Bt Abdul Razak who made this research possible. Her endless guidelines, advice and answers throughout all the stages of writing our proposal have helped us to organize carefully and become more mature in dealing with problems regarding the writing. Without her commitment and dedication, this report would not have been materialized.

Moreover, we would like to express our gratitude towards our family members for giving us endless support both mentally and physically that help us to perform and complete the proposal accordingly. Millions of thanks to our parents who have supported us to complete this writing on time by providing their support and giving us a lot of encouragement throughout the completion of this writing.

Moving forward, we would also like to thank our friends and classmates and everyone who has helped us directly and indirectly throughout the completion of this assignment. We are forever grateful for all of your moral support and encouraging words. We are in this together. For those who are involved in our research, help assist our research, and may Allah S.W.T bless you a lot. This task will not be completed on time if not for your help and support.

Lastly, we would like to thank us for enduring the hardship and reaching this point. We are powerful women, and we did it.

We hope that this small contribution serves as a starting point for the agenda of empowering knowledge mastery in society.
