ACKNOWLEDGEMENT

Firstly, my most thankful wish for the Almighty Allah s.w.t in allowing me to pursue and successfully complete this Dissertation. I would like to express my greatest gratitude sincerely to a wide range of people who have offered their assistance in the drafting of this dissertation especially to my supervisor, **Prof Madya Suria Sulaiman** for his encouragement and unfailing support.

I owe a special thanks to all those who agree to be interviewed, either formally and informally and gave me the benefit of their knowledge, views and experience. Their names are by no means exhaustive and it is too long to list down all and unfair to mention some. Here I would like to express my greatest gratitude and appreciation's to those who were directly and indirectly involved in making this dissertation a success.

Last but not least, special tributes to my beloved parent, Azizan B. Said and Farihah Bt. Yusof for their encouragement, patience, understanding and support during my study and are indeed my main source of inspiration.

CHAPTER 1

TOPIC:

The Golf Club: Ground Maintenance of the Golf Course

1.0 INTRODUCTION

In Malaysia nowadays, there are a lot of golf and country clubs. Rapid economy growth has led to various types of golf courses. Golf courses have been constructed long time ago and still been constructed today. It is functioning as it meant to be a sport venue for playing golf. This part is in order to take care or maintain the golf course in order to fulfill its function, a specific method has to be used. The maintenance works should be in the perfect method in order to meet this requirement.

1.1 ISSUE

Malaysia is a country of contrasts, where thick jungle meets the azure sea, skyscrapers alternate with placid villages. With more than 200 golf courses currently available around the country, some of them ranking alongside the best in the world, the question of how the ground maintenance of the golf courses is actually done. Generally known that to maintain the golf courses need high budget including the material, the specialist and the workers to do it. Therefore it is wise to know how
