WASTE MANAGEMENT IN PULAU PERHENTIAN

ABSTRACT

This dissertation will cover totally about the waste management in Tourism Island. The selected island is Pulau Perhentian which is located in Besut district, Terengganu.

Generally, good waste management is very important to the whole area including the island. It become seriously for the islands which are belonging to tourism centre. This is because, without the proper management implementation, will affected the tourism to come over there.

Beside that, improper waste management also will give inconvenience for the tourism even for those who are living in the appointed island. Effect that caused by the improper waste management spread to various types of environmental effect. For examples are public health aspects, air pollution and water pollution. All these environmental effect will contribute the uncomfortable and inconvenience definitely.

In have a good waste management in island areas, all parties should have concerning and high responsibility. All these features will be aid to make the

waste management are carried efficiently. Even though the Local Authority has the major authorized in part of waste management, other parties should take part in make sure that the waste management in a good condition for the all times. The residents also will assist through the concerning and their responsibilities. Their contribution will carry out with follow all the regulation stated by Local Authority and concerning about the surrounding of the island and aware about the island cleanliness.

In this dissertation, questionnaire is contributed to the chalet's owner, other business's owner and resident who are living in Pulau Perhentian. This is important to know how their responses related about the waste management which implemented. All these responses can be as a guide liner in measure level of their comfort ability and in the same time it will show the weakness of the management and should be improve by the involved parties.

So, all parties should play roles in make sure that the waste management will be improve from time to time and the other major problem are avail to avoid. These collaborations avail to achieve all the Pulau Perhentian residents and visitors comfort ability.
