Acknowledgement

Alhamdulillah, I wish to express my thanks and gratitude with particular mention to my supervisor; **En Mahayudin b Mahmood** a lecturer from the Department of Building Surveying, Faculty of Architecture, Planning and Surveying, University Technology Mara, for his guidance and assistance during the preparation of this dissertation.

I also wish to convey my special thanks to my parents and my family for all their support and in making this dissertation possible.

Sincere thanks also goes to my friends for the inspiration and driving force behind my efforts who have given assistance in terms of materials and ideas, directly or indirectly.

Last but not least, I would like to forward my sincere thanks to all the staff from Wet World Shah Alam, Desa Water Park and Wet World Pedas for their useful information on theme park. Besides that, I would like to thank all those who have answered my questionnaire sincerely and I hope that the experience and knowledge gained during this research would be useful to me in the future.

CHAPTER ONE

1.0 Introduction

1.1 Theme parks, which is also known as amusement parks is a collection of amusement rides and other entertainment attractions assembled for the purpose of entertaining a fairly large group of people. It is basically more elaborate and complex than a simple city park or playground, as a theme park is meant to cater to adults, teenagers, and small children. In order to satisfy these parties, facilities management of a certain theme park is very important that should be taken seriously. With a good facilities management program, it will certainly increase the functionality and the value of the theme park itself.

Rationally, the main objective is to provide a proper and comfortable space or condition to building users besides to increase the quality or standard of the facilities provided. The good facilities management will reduce the wastage and gain the higher profit. Furthermore, as an example, this dissertation is focused on space planning of theme park and as we know, this kind of place are surely exposed to the public and it might be used daily by hard activity and it sure needs a proper management to maintain its function in future.
