## MOISTURE PEN CASE (PRODUCT DESIGN)

Design Advisor : MRS IZZA SYAHIDA ABDUL KARIM

At the end of 2019, a new virus had emerged and made the whole world live in a state of worry. This is because the virus can cause death. This makes anyone depressed because they can't carry out daily activities like the previous years. This matter is very worrying if there is no solution in this situation, the whole world will experience a huge problem of increasingly crippling the country's economy due to this virus. Due to Covid-19, hospital staff and frontliners experience more stress because they have to work overtime to maintain the well-being of the country.

Moisture is a pen case product which can relieve stress when using it. This product is suitable to use for those who are under stress and do not know how to relieve stress. The novelty of this product can be seen from the function of this product, it can relieve a person's stress quickly if squeezed. Meanwhile, this product also uses a material that is good for the environment which is silicone material. The objectives of Moisture are (1) the product can help relieve stress quickly, and (2) the product can benefit the doctors and nurses in carrying out tasks during the Covid-19 season.

A descriptive survey was made through Google Form and they told what can help them to relieve stress. From there an attempt to create this product. They expressed by squeezing something, their pressure becomes subsided. In addition, this survey also asked for opinions on colors, how to use, how to store and also the appropriate weight. Based on the reported result, it is shown that, most of the total is 80 percent selected a picture that can be squeezed as a tool that can relieve stress. In addition, the product must be light and easy to carry. It is hoped that, with this invention, this product can benefit everyone, especially doctors and nurses. This is because they work very hard to take care of the many Covid-19 patients.
