HNYCOMB ARMCHAIR

Design Advisor : MR ABU HANIFA AB HAMID

HnyComb is armchair inspired by honeycomb. Armchair is very comfortable cushioned chair with a support on each side, where you can rest your arms while you sit. Some armchairs are big enough that you can curl up and read a book in them. Armchairs are distinguished by their "arms," rests built to comfortably support your arms.

The theme for this design is urban luxury. The luxurious design with the presence of a honeycomb shaped pattern makes this chair even more prominent. In addition, this armchair proposes a combination of two materials for the chair frame which are wood and metal. On the seat side using a sponge and wrapped with fabric.

The objectives of HnyComb design are to produce an armchair that has a natural element and applies a privilege for those who love nature. At the same time improving the design style like element, function and material.

It is hoped that, the design can inspire anyone who sees it. Because this chair incorporates natural design and translates into chair design.
