CALMLYY AIR HUMIDIFIER WITH WATER FOUNTAIN (PRODUCT DESIGN)

Design Advisor : MRS IZZA SYAHIDA ABDUL KARIM

The long overdue lockdown has affected people's mental health. This has caused them to feel distress and restlessness. Since Covid is a new virus, some of the conventional medicines don't work on people so they're trying out a holistic approach. It has proven that some home remedy has helped ease some of the Covid symptoms. Although it doesn't cure the disease, it does give relief/comfort to the person. Calmlyy is a personal health product that specializes in home remedies for personal well-being that can help people de-stress, stay fresh, stay calm, and feel really good. Aside from that, I'd want to create a dualfunction product that can inhale and emit unclean air utilizing only natural ingredients. This is because natural ingredients such as herbs, spices, and mint leaves are safer to be used with an air humidifier because they do not contain preservatives and the original scent will originate from the ingredients used to clean and refresh the air. This product is for a family or a single person who's really concerned about hygiene and want to save the time and money. Apart from that, this product can make work easier and is portable. The most important factor is that it can prevent stress, bacteria, and smooth breathing in the home.

The objectives of Calmlyy are (1) to design an Air Humidifier that can used essential oils sold in the market, natural ingredients and also home-made aromatherapy starch, (2) to design dual function Air Humidifier that also can be home decoration, and (3) to design an Air Humidifier that use sustainable material. It is intended that by adapting this invention, people will feel easier and safer, as there will be no harmful materials or ingredients while using Calmlyy. With that in mind, people will save time because they won't have to travel out of the house to acquire essential oils that are sold in stores, which will cost consumers more money. Users will feel safer and will improve mental health issues as a result of Calmlyy.
