FLOOR TicTac

(PRODUCT DESIGN)

Design Advisor : MADAM IZZA SYAHIDA ABDUL KARIM

covid-19 has change our education system completly. most of the students either highschool or university or secondary school have to face with ODL (Online Distance Learning) this also have cause a lot of stress towards student and also a teacher. In the mid of 2021, government finally decided to open the school in stage but with the tight SOP has cause lack of activity between student. so i decided to create an educational floor base tic tac toe games to ensure social distancing between students and also to encourage students having a an activity in school. Tic Tac Toe is a simple and fun game which consist 2 people, X and O it is play on 3x3 grid . Each players game is to make 3 in a row. Players take turn in placing their marks X or O on an open square in the grid, the first player3 of their own marking row vertically, horizontally or diagonally win the game. The reason I create this game is for students to have fun in school without worrying about their physical contact. This FloorTicTac is floor base game and the students can move their marking using their leg so they don't need to use their hand to change the marking. The marking flappable so they can flip it using their leg

as my survey only revolve around teacher only. Most of them age 30 and above and only some of them is around 20-29. Most of them choose gaining knowledge and ensuring their mental health is the main reason why social interaction is important for students.the survey shows that majority of them prefer the floor base tic tac toe game in pop-art style as they have colourful colour. They also prefer that the game should be foldable and light so it will be easy to keep them and carry them around. They also suggest that the product should be durable to avoid getting vandalize. Based on the reported result, it is shown that, most of the teachers prefe the students have an activity for them so that their stay in school would not be boring. This also can ensure their mental health as they will have more physical activity and interaction between friends. And not just staying inside the classroom
