Shah Alam, Selangor

November 1991

ACKNOWLEDGEMENTS

The author wishes to express his sincere gratitude to those who have contributed to the completion of this project. Especially, countless thanks to Mr. Mohd Yusuf bin Mohd, Senior Lecturer, Mechanical Engineering Department, ITM for his supervision and valuable guidance and suggestions which enable the author to complete this project.

Thank also to Mr. Zakaria Mohd Sharif and Mr. Burhanuddin Adnan the staff of Engineering Computer, ITM for their helpful and co-operation during the course of this project and Mr. Ridwan Abdul Rahman for valuable assistance during fabrication of the products. Finally, the author also wishes to express his thanks to MARA for providing the loan which enable the author to complete his program of study at ITM.

Abstract

The use of Computer Aided Design and Manufacturing (CAD/CAM) in industry will result in an improve productivity, saving time, increase in machine utilization and etc, or in other words it is substantially better than the conventional techniques. This Advanced Diploma project is an attempt to develop an integrated computer programs to facilitate the design of products, the production aspect and as well the production planing.

This project also include the algorithms to improve the efficiency of machining which in an extension of the primitives CNC procedures. The software was written in AutoLISP (Artificial Intelligent) to transfer part programming with interactive CAD. The system also automatically produces tapes for conventional NC machine tools, which are used as teaching aid for the undergraduate students to study NC part programming and familiarize with interactive graphics on CAD. This package enable the user to design and manufacture parts easily because it is an interactive package and menu driven.

TABLE OF CONTENTS

<u>CHAPTER</u>	<u>TITLE</u>	<u>PAGE</u>
	Title Page	i
	Project Approval	ii
	Acknowledgements	iii
	Abstract	iv
	Table of Contents	v
1.0	INTRODUCTION	1
1.1	General	1
1.2	CAD/CAM System	2
1.3	Literature Review	3
	1.3.1 History of CAD/CAM	3
	1.3.2 CAD/CAM Software Development	3
1.4	Objective of Project	6
1.5	Scope of Project	7
2.0	COMPUTER-AIDED DESIGN (CAD)	8
2.1	The Application of Computers for Design	8
	2.1.1 Geometric Modeling	8
	2.1.2 Engineering Analysis	9
	2.1.3 Design Review and Evaluation	10
	2.1.4 Automated Drafting	11
2.2	Creating the Manufacturing Database	12
2.3	Benefits of Computer-aided Design	13
2.0	COMPUTER-AIDED MANUFACTURING (CAM)	15
3.1	The Numerical Control Machine	15
	3.1.1 Computer Numerical Control	16
	3.2.0 Function of Computer Numerical Control	16
	a. Machine tool control	16
	b. In-process compensation	16
	c. Improve programming and operating features	17
3.2	The NC Procedure	17
3.3	Advantages of CNC	20
	a. The part program tape..	20
	b. Tape editing at the machine site	20
	c. Greater flexibility..	20
	d. User-written programs	20
	e. Total manufacturing system	21

<u>CHAPTER</u>	<u>TITLE</u>	<u>PAGE</u>
4.0	PROGRAMMING PLANING	22
4.1	The use of Microcomputer in CAD/CAM System	22
4.2	CNC System with Integrated Interactive Graphics	23
4.3	High Level programming languages	24
	4.3.1 AutoLISP	24
	4.3.2 The reasons chose AutoLISP	25
4.4	Artificial Intelligence (AI)	26
	4.4.1 AI in Computer-aided Planning	26
	4.4.2 AI in Engineering Design and Manufacturing	27
4.5	Expert Systems	28
	4.5.1 Structure of Expert Systems	29
	4.5.2 The use of Expert System in CAD	30
5.0	THE SYSTEM DEVELOPED	31
5.1	Computer-assisted Programming in CAD/CAM	31
5.2	The Hardware	31
5.3	The Software	32
5.4	The programming System	33
	5.4.1 Geometric Definition	33
	5.4.2 Tool Path Generation	34
	5.4.3 Manufacturing Database	34
	a. Cutting data	34
	b. Machine Tool data	35
	c. Material of Workpiece	35
5.5	NC Programming	35
	5.5.1 Types of Command in NC Programming	36
	a. Positioning (G00)	37
	b. Linear Interpolation (G01)	37
	c. Circular Interpolation (G02/G03)	37
	d. Absolute and Incremental Programming (G90/G91)	38
	e. Circular Path Tangent to Previous Path (G08)	38
5.6	The Structure of Package Developed	38
6.0	CONCLUSIONS AND RECOMMENDATIONS	41
	6.1.0 Conclusions	42
	6.2.0 Recommendations for Future Development	43
