PO-BOX

PERSONAL DELIVERY POST BOX (PRODUCT DESIGN)

Design Advisor : MRS FADILA MOHD YUSOF

In the current era, the covid-19 epidemic has greatly affected everyone including Malaysian's. Many are affected, as well as many new ways of living life to cope with the epidemic. Due to the pandemic, and not being able to leave the house without important arrangements, everyone is advised to buy online to facilitate the repair of the outbreak. However, some Malaysian's do not comply with the SOPs that have been set. Some of them accept the items purchased online directly and make physical contact with the sender. The sender on duty may have been infected with the coronavirus from a previous home. Furthermore, if we are not at home, the items ordered will be placed in front of the house just like that. The goods are feared to be damaged when left unattended.

PO-BOX is a product specially designed to overcome this problem. Mailboxes in Malaysia are usually used for office use only, but times have changed with the current. PO-BOX evokes nostalgia for the war-torn past when there was no internet network and everyone used letters to communicate on those far away also exchanging information.

The PO-BOX is made from a combination of pinewood and cotton rope that can hold items purchased online including wet items. This is because the material used at the bottom is rope. Pinewood is considered a strong and durable type of wood. It is used for any woodworking task and is great woodworking. The combination of these two ingredients is the best choice.
