ACKNOWLEDGEMENT

Alhamdulillah, praise to Allah S.W.T the Al Mighty and Merciful, because of the blessing that made possible for this project to be completed in time.

This thesis is prepared to fulfill the graduation requirement of Bachelor of Business and Administration (Honours) Finance. One semester of completing this thesis together with the classes to be attended as the requirement on the completion of BBA (Honours) Finance has given me opportunity to gain knowledge and being exposed to the current economic condition before continuing with the future endeavor challenges.

Foremost, I would like to take this opportunity to express my sincerely gratitude to all those efforts facilitated in the completion of this thesis. Without helped and support from various people, the completion of this study would not be made possible.

Firstly, I would like to express my deepest gratitude and thanks to my most respected thesis advisor, Puan Nor Hazila bt Ismail, from whom I sought and received valuable guidance, comments, views, advices as well as encouragement based upon her own extensive experience. I am also grateful for her tolerance towards my weaknesses and ignorance in completing this thesis. I wish to express my special word of thanks and indebted to En.Muhamad Sukor bin Jaafar, who also responsible for the preparation of the contents and the flow of the thesis.

Special thanks are due to all staff of Uitm Johore library and Bursa Malaysia's library for their helped, guidelines and information regarding this study. To my colleagues, especially the BBA (Honors) Finance 06, thanks for all your constructive critics, Last but not least, special word of thanks and sincere gratitude to my beloved family, for the prayer and constant support for the beginning until the end of this study. Thanks a million.

ABSTRACT

This study seeks to examine the impact of discount rate towards Kuala Lumpur Composite Index including the Treasury Bills and stock market returns. Specifically, this study will determine the existence of linkages and causality between the Kuala Lumpur Composite Index as well as the Treasury Bills trend and stock market performance.

Secondary data being used for this study are monthly stock price, Treasury Bills Rate and KLCI Index. This study concentrated on the 40 companies listed in Main Board of Bursa Malaysia. The method that will be used is event study method that comprised of before and after the discount rate changes took place.

This study is conducted by using Microsoft excel in order to find the beta value of the security through regression. This program also important to calculate abnormal return, return of security, and the changes of treasury bills as to measure the effect of those changes towards Kuala Lumpur Composite Index (KLCI).
