ACKNOWLEDGEMENTS

This work would not have been possible without the support and encouragement of colleagues, course-mates, friends and my family.

My sincere appreciation especially goes to my Advisor En. Mohamad Bustami for his invaluable guidance, tolerance and patience to produce this project paper. The Course Coordinator for BM220 program, Cik Habibun Adjmal who have been supportive and who worked actively to provide me with personal and professional guidance during the course of my studies.

My special tribute goes to all the lecturers who had guided me through the years during the many seminars on campus. As my teachers, each has taught me more than I could ever give them credit for here.

I would especially like to thank my colleagues, The Head of Credit Unit, Puan Salmiah Hj. Ahmad Hijazi; Accountant, Cik Sainah Hussin; Planning and Evaluation Officer, Puan Clare Lojiu and Officer In-Charge, Ko-Nelayan Kudat Regional office, En. Baingkon Sarikal for their advise and help in collecting and supplying the relevant information to produce this project paper.

I am grateful to all of those with whom I have had the pleasure to work during this and other related projects. Each of them has provided me extensive personal and professional guidance and taught me a great deal about both marketing research and life in general.

Nobody has been more important to me in the pursuit of this project and especially my studies than the members of my family. I would like to thank my parents, whose love and guidance are with me in whatever I pursue. Most importantly, I wish to thank my loving and supportive husband, Bernard Hugh and my five wonderful children, Genevieve, Sharon, Kimberly, Bernice and Ivan, who provide unending inspiration.

ABSTRACT

This is a research study on the problems faced by small-scale downstream fishery industry entrepreneurs in the Kudat region, Sabah. The study was conducted to fulfill the requirement as needed by the Faculty of Business Management, Universiti Teknologi MARA.

The main objective of this study is to identify the problems that are significantly affecting the downstream fisheries entrepreneurs especially fishermen assisted by Ko-Nelayan under the Small-scale Downstream Fishery Industry (PIKP) Loan scheme. The study was confined in the Kudat region because of the large number of fishermen assisted under the RM9 allocation program are from Kudat area.

The study has given an overview of the problems faced by the small-scale downstream fishery industry entrepreneurs. This was reflected by the fact that lack of capital, low product prices, transportation problem, lack of market information and an unstable supply of raw materials problems faced by them. The finding shows that most of the respondents are operating only on a part-time basis and are not engaged in any other activities.

The conclusion suggested that the assistances and Loan programs currently extended by Ko-nelayan does not adequately address the specific needs of the small-scale downstream fishery entrepreneurs. This was reflected by the fact that lack of capital, low product prices, transportation problem, lack of market information and an unstable supply of raw materials problems faced by them.

These situations cannot be left unattended, as their dependency to these activities is very high as it is common facts that in rural area and small town like Kudat, alternative employment opportunities are difficult to get or even non-existent.
