**ASSC. PROF. DATUK DR. HAJI ABDUL KADIR BIN HAJI ROSLINE**

**DECEMBER 2016**

## **ACKNOWLEDGEMENT**

First of all we want to thank our supervisor Datuk Dr Hj. Abdul Kadir Bin Hj. Rosline and Madam Dayang Siti Saufidah Binti Awang Saufi who are really dedicated in helping us throughout this research by guiding us to in finding a solution and gave us an inspiration to finish this research.

Next we want to thank the UiTM library for their excellent cooperation with us to provide us with the sufficient resources that we need in order to do this research. They has provided us with great database of previous research in their online database which is convenience and easy to obtain and analyze the research.

In developing the data we also want to thank the lecturer who taught us, especially about in conducting the SPSS system. The knowledge that we get is really useful in helping us to analyze the data in more scientific and effective approach to produce a valid and relevance data.

In terms of moral support we would like to thank our parent and family who were very supportive in helping us by giving us the strength and motivation for us to be more determined and motivated to continue this research. Without all of them this research could not be realized and completed at the right time.

We would like thank God Almighty without whose blessing we will not have successfully completed this study.

## ABSTRACT

3D's jobs are some kind of job that involve criteria that are dangerous, dirty, and difficult. The awareness of these kind of opportunities seem to be overshadowed by negative impressions of people that seen demeaning and tarnished one's reputation whom entered these sectors. As the result, the participation among Malaysian youth were low and this opportunities were being grabbed and dominated by the foreign workers. This study examines the involvement of youth in 3D's jobs sector and level of willingness of youth who are interested to participate in these jobs from the point of view of Malaysian youths in Kota Kinabalu. A random sample of 300 youths from Kota Kinabalu City with age range between 15 to 40 years old were interviewed on two major issues. The researchers findings show the level of willingness were moderate. Meanwhile, the results clearly highlighted that the youth in Kota Kinabalu will only agree to work under a certain circumstances which is when all the factors associated with their willingness are improved to another level that is more worker friendly in term of salaries offered, working environments, safety and health.

# **CONTENTS PAGE FOR RESEARCH REPORT**

## **CONTENTS**

### **CHAPTER I: INTRODUCTION**

Introduction	1
Background of the Study	1
Problem Statement	2
Research Objectives	5
Research Questions	6
Scope of Study	6
Significance of the Study	6

### **CHAPTER II: LITERATURE REVIEW & CONCEPTUAL FRAMEWORK**

Definitions	9
Conceptual Framework	16

### **CHAPTER III: RESEARCH METHODOLOGY**

Introduction	26
Research Design	26
Unit of Analysis	27
Sample Size	27
Sampling Techniques	28
Process Measurement	29
Data collection	30
Data analysis	31

## **CHAPTER IV: FINDINGS AND ANALYSIS**

Introduction	32
Reliability Test	32
Respondents Demographic Profile	33
Evaluation on Willingness of Youth to Involve in 3D's Jobs	35
Evaluation on Perception of Salary and Wages	37
Evaluation of Perception on Working Environment	38
Evaluation of Perception on Safety and Health	39
Evaluation of Perception of People	40
Mean and Level	41
Determine Level of Involvement	42
Find out the Factors Associated/Influencing	43

## **CHAPTER V: DISCUSSIONS AND CONCLUSIONS**

Introduction	47
Conclusion of Research Objectives	47
Implications	48
Limitations	50
Recommendations	51
Conclusion	53
