ABSTRACT

The high trend of unclaimed Islamic land inheritance properties has become a protracted and growing issue in the life of the community in Malaysia. Most of the problems of inheritance land management stem from the confusion or scramble of the heirs over the assets as well as the failure of the property owner to manage his property efficiently during his lifetime. The problem of estate management must be addressed immediately to improve the economy of Muslims in various aspects by liquidating and utilizing the value of frozen assets that have not been claimed by the heirs of the deceased for a long time. Therefore, the issues and challenges related to the management of land inheritance property in Islam need to be put to an end. This research has three main objectives namely the first, to understand the concept of inheritance land in Islam. Second, to identify issues and challenges in the management of land inheritance property in Islam and the third is to analyse the best methods in managing Islamic land inheritance. The data obtained in this research is from wholesale interviews that have been conducted online to several syarie lawyers in the state of Selangor. The data that has been analysed is to evaluate and study the problematic factors of Islamic land inheritance management and the best management methods based on the experience of syarie lawyers in solving problems related to Islamic land inheritance property. Therefore, the results of this study can answer all the objectives that I have given to the respondents related to issues and challenges in managing Islamic land inheritance among syarie lawyers in Selangor.

ACKNOWLEDGEMENT

Firstly, I wish to thank God for giving me the opportunity to embark on my Diploma and for completing this long and challenging journey successfully. My gratitude and thanks go to my supervisor Dr Farah Safura binti Muhammud. Thank you for the support, patience and ideas in assisting me with this project. I also would like to express my gratitude to the syarie lawyers for providing the facilities, knowledge, and assistance. My appreciation goes to Dr Mohammad Syukri Bin Jalil and the lecturers who provided the facilities and assistance during sampling. Special thanks to my colleagues and friends for helping me with this project.
