ABSTRACT

The study is focusing in factors lead UiTM graduate's intention to become an entrepreneur in UiTM Seremban 3. The study used online questionnaire with respondents among the administrative science policy students of UiTM Seremban 3. The instrument of the online questionnaire was prepared and distributed by the University Technology Mara Final Year Science Administration students. A bulk of the Online questionnaires was from the UiTM students with more females responding. In general, the findings showed that respondents were highly interested to become an entrepreneur among in UiTM Seremban 3 and intention from graduation to become entrepreneur one day. The respondents believe that the best way to decrease the unemployment among the graduate's is to involve themselves into entrepreneur world. The respondents were also strongly agreed that being an entrepreneur would give the students great satisfaction. Moreover, interesting findings shows that respondents tend to believe that among various options, the students would rather be an entrepreneur.

ACKNOWLEDGEMENT

First, praise and gratitude to Allah for the showers of blessings during our work to successfully complete the research. It was a challenging task for us to complete the work.

Luckily, though, we have had the support of many parties in making this mission a success. All the stakeholders involved in completing this research kept us motivated and on the course at all those moments when things didn't go as intended. We would like to express our deep gratitude to our supervisor, Madam Farihah, for giving us the opportunity to do research and guide us on a lot of research and always give us a positive mindset that she didn't tell us would be hard. We are learning a valuable lesson about in action studies. Thank you for supporting us with this research, with patience and ideas. Special thanks to Nurul Hidayana to our subject lecturer, because we taught the methodology for conducting the research and providing guidance and knowledge in the production of this research work as clearly as possible.

We are extremely grateful to our parents for their prayers, care and sacrifices to educate and prepare us for our investigation. We would also like to express our gratitude to our colleagues and friends for helping us with the research that we would like to thank and thank the respondents at UiTM Seremban 3 for their contributions to the data collection for this research.
