ABSTRACT

For this study, it was conducted to determine factors that influence level of employees performance in Return to Work Programme in Return to Work Programme Centre in Melaka. The factors observed in this study were behaviour, personal and environment. In this study, the research objective is to identify the relationship between all the factors that influence level of employees performance in Return to Work Programme (RTW). There was total of 148 respondents were given a set of questionnaires via online and need to be answered. Basically, the respondents are the employees that participate in Return to Work Programme (RTW). All of the factors mentioned above was found to have a positive significant relationship with the level of employees performance in Return To Work Programme (RTW).

ACKNOWLEDGEMENT

First and foremost I would like to thank the almighty God for giving us blessings and strength to finish our research.

We would like to convey our heartfelt thanks to Sir Bastiyan, our research supervisor, for enabling us to conduct study and giving essential guidance during this process. We were motivated by his enormous expertise and earnestness to do the investigation as thoroughly as feasible. We won't be able to finish this study without his assistance. Not to forget, big gratitude to Mr. Mohd Ramlan for teaching us the subject.

We are eternally thankful to our family for their unwavering love, prayers, and sacrifices in order to educate and prepare us for a better future. Their remarks inspire us to overcome numerous obstacles in order to accomplish this study.

Last but not least, we'd want to express our gratitude to you, our friends, for your encouragement, support, and sharing of helpful hints in completing this work. Every battle we go through will be remembered till the end of our lives. Overall, we are grateful to everyone who contributed to the completion of this study.
