

DESIGN OF MULTIFUNCTION BENCH AND PICNIC TABLE

MUHAMMAD KHALAF BIN ZAKARIA

**Final Year Project Report Submitted In
Partial Fulfillment Of The Requirements For The
Degree of Bachelor of Science (Hons.) Furniture Technology
In the Faculty Applied Sciences
Universiti Teknologi Mara**

JANUARY 2014

ACKNOWLEDGEMENT

Assalamualaikum w.b.t

Praise to the almighty Allah the most gracious and the most beautiful for this blessing that give me health and strength to finish my final project within the given time.

My specially thanks to my project supervisor, Dr. Shaikh Abdul Karim Yamani Bin Zakaria for his support, suggestion and critics that contributed toward the completion of my final project.

My sincere thank to other lecturer and staffs of Furniture Department. Without their help, support and contribution, this project cannot run smoothly and be completed. To my family and friend that always give me support and strength. For all your kindness, I really appreciated it. May Allah bless you all.

Thank you so much.

ABSTRACT

Design of Multifunction Bench and Picnic Table

Furniture is a necessity that is now becoming a trend from time to time in accordance with current technological development. In the furniture development, an increasingly trend for the more compact of the space saving furniture are made in demand. Therefore, to address this problem, furniture designs with various functions that can be used in limited space such as the small room, apartment, parks, and picnic areas. Multifunctional furniture such as benches and picnic tables are able to achieve a high demand in the world market based on demand from consumers and the problems they faced. These statements are made based on the results of the questionnaire for the user based on the type of wood used , the concept of function , durability and comfort , saving space , and the market price for the unit. Results have shown that majority of the consumers support or accept multifunction products such as benches and picnic tables as an alternative that can solve the problem of space - saving and cost- saving rate of production and marketing costs. In addition, based on the results of most users agree or prefer to use multi-functional furniture as part of their household items.
