

SYLLABUS DEVELOPMENT WORKSHOP *For* MASTER PROGRAMME IN ACCOUNTANCY

Faculty of Accountancy, UiTM Perak Branch has moved one step ahead in proposing a Master Degree programme in Accounting and Information Technology (IT). Thus, a two-day workshop was conducted in February 2018 to develop a syllabus structured for the programme.

This master programme will not only focus on the accounting area but Big Data Analytic will be given an emphasis too. This emphasis is in respond to the demand of Industrial Revolution 4.0 that university graduates must have the ability to cross fields and to be competent in multiple areas.

In her opening speech, Dr Nooriha Mansor, Head of Faculty of Accountancy aspired the academics to update their knowledge and skills in order to be relevant in the ever-changing world. She hoped that with the development of this new programme that combines two separate but relevant fields of Accountancy and Information Technology, the faculty can produce more versatile and well-rounded Accounting graduates.

The team has worked diligently throughout the workshop to ensure the courses offered are in line with the programme's main objective. The proposed courses were then submitted to the head of the programme, Enny Nurdin Sutan Maruhun for further review in June 2018.
