ABSTRACT

The purpose of the study was to examine the psychological impacts of the online learning towards Malaysian university students. This study identified the relationship of lack of face-to-face learning and worry about future study plans towards education problems. The study was carried out between July 2021 until February 2022. This study utilized a non-probability sampling technique in collecting the data survey. The result of the study revealed two important findings. First, majority of the respondents agreed with the existence of lack of face-to-face learning, worry about future study plans and education problems. Second, there is a significant relationship between lack of face-to-face learning towards education problems and there is a significant relationship between worry about future study plans towards education problems. Therefore, the studies distinctly position itself to make both empirical and theoretical contributions to psychology literature.

Keywords: Psychological impacts, Online learning, Lack of face-to-face learning, Worry about future study plans, Education Problems.

ACKNOWLEDGEMENT

First and foremost, we would like to be thankful to Allah S.W.T the almighty for his mercy and guidance in granting us full strength in completing this research proposal. Even though we had faced some difficulties in finishing this task, we still managed to complete it.

Next, we would like to thank our lecturer and also tutor Datin Nor Syamaliah Binti Ngah, for the subject (ADS511) Research Methodology and Data Analysis and (ADS555) Applied Research Project for teaching and guiding us in the process of completing this research proposal. Our special thanks to Dr. Wan Normila Mohamad in co-supervising our research to completion.

Besides that, we are thankful to our parents as they were indeed being very helpful in the completion of the task. Also, they had helped us in providing a sufficient amount of need such as the comfortable environment in doing the assignment, the privilege of internet connection in order to complete the task, and also supporting us both physically and morally.

Last but not least, we would like to thank our classmates as they had been a tremendous help to us in completing this task. They had helped and also supported us morally.
