ACKNOWLEDGEMENT

I take this opportunity to express my profound gratitude and deep regards to my advisor Ms. Norhasniza and Mr. Syamsul Samsudin, for their guidance, monitoring and encouragement towards this research paper. The blessing, help and guidance by them time to time shall carry me a long way in the journey of life on which I am about to embark.

I also take this opportunity to express a deep sense of gratitude to my course mates for the positive support, valuable information and guidance, which helped me in completing this task through various stages.

I am obliged to staff members along with my internship at Hotel Sri Malaysia, Johor Bahru for their information that being provided in their respective fields. I am grateful for their cooperation during the period of my attachment and assignment.

Moreover, not forget to thanks to my family and all my friends for their help towards this research paper by giving a information that I needed. Without all participants above I am sure these research papers would not be completed.

Lastly, I would like to thank to all who had contributed to this paper directly or indirectly, physically and emotionally.

Thank you,

Aimi Amalina bt Tajudin

Abstract

The purpose of this research is to determine the relationship between macroeconomic determinants and the exchange rate in Malaysia. Exchange rate is the main indicator in this research. This research consists of independent variable such as, interest rate, consumer price index and gross domestic product. This study aimed at investigating either exchange rate relatively affect by the macroeconomic determinants. Data were taken from the Thompson Data Stream for the quarterly period of 2004-2013. Multiple regressions are applied to find the result for this research.
